

CIVICUS- CIVIL SOCIETY INDEX RESEARCH PROJECT

Country Report- Palestine

Funded by:

Welfare Association Consortium- PNGO project and the Canadian International Development Agency (CIDA), through the Canadian Representative office in the West Bank and Gaza Strip.

MARCH 2006

Ramalla, Palestine

Acknowledgement

The report has been achieved with the generous support of the Welfare Association Consortium-PNGO project and the Canadian International Development Agency (CIDA), through the Canadian Representative office in the West Bank and Gaza Strip.

The contents on of this report do not represent the views or opinions of either funding organization and are the sole responsibility of BISAN Center for Research and Development.

Overview

There is an immense quantity of literature available on the Palestinians of the West Bank and Gaza. The task of the overview report is to evaluate where the gaps are in the literature that pertain to civil society and that can be closed through research in the context of the CSI project methodologies. Ultimately in the final country report, directions for future research on the role of civil society in Palestine will be suggested. The overview report is a working document as it will be updated and enhanced throughout the course of the project as there is a plethora of available secondary data. The paper investigates the literature on Palestinian civil society produced in and outside of Palestine through an exploration of the structure of the four dimensions and associated guiding indicators defined by CIVICUS for this project.

There has been much attention given to certain aspects of the work of Palestinian civil society. The history of the women's movement in Palestine¹ and the first Intifada as a popular uprising² have been much discussed in academic circles as well as political ones. The women's movement is traced to origins in the 1920s, organized labour to the early 1900s; the history of political parties, press, and charitable institutions has also been examined to a certain extent, and there is a recent and growing literature on the role of non-governmental organizations.

It is worth emphasizing in the Palestinian case that civil society is being discussed in the context of a society in the process of uncertain state-building as well as resistance, so the literature and available itself is partially forward-looking and prescriptive rather than descriptive or analytical of the current situation. A great deal of the existing literature is produced within the context of specifically funded programs and projects which can run the risk of narrowing not only the readership of these works but their usefulness in examining the society as a whole. For example studies and research on 'impact' for the most part are generally limited to assessments, audits, and evaluations of particular programs or projects rather than civil society, NGOs, or social movements. And many of these appraisals remain confidential or in the hands of those in charge of the project with no intention for dissemination. Islamic institutions have largely been left out of research on civil society and NGOs in Palestine and this oversight has serious ramifications as they play a significant role in a number of sectors of society.

Structure of Civil

Given the concurrent situation of the ongoing Israeli occupation of the West Bank and Gaza Strip and state-building processes it is necessary to understand both the participation of citizens independently and in the context of civil society organizations, as well as the extent of this participation in order to understand potential for effective mobilization and participation of Palestinians in all levels and types of political processes and actions.

¹ See for example English resources in the "Bibliography on Palestinian Women" by Saliba Sarsar available at <http://www.columbia.edu/cu/lweb/indiv/mideast/cuvlm/palwomen.html>.

²

Non-partisan political action is difficult to assess in Palestine, partially because of the individual and under or undocumented nature of some actions, and partially because such actions like attending demonstrations are ambiguously partisan. More research has to be conducted on non-partisan political action in the case of boycotts, participation in public discourse, demonstrations, and advocacy, the types of organizations and bodies that foster such work, and with what kind of support and motivations.

Voluntarism has increasingly been mobilized by professional non-governmental organizations – often specific and short-term programs within these organizations – rather than grassroots organizations and popular committees or local government, and in some cases ‘voluntarism’ is being remunerated. Research needs to be conducted not only on the current nature as well as frequency of voluntarism across all sectors. Charitable giving is difficult to gauge as such monetary support is distributed within families or without structural frameworks, in addition to through philanthropic societies and organizations. Contemporary collective community actions are important to understand in the context of the Intifada especially as they are largely associated with localized efforts and it is difficult to recognize and identify them across the society.

Current membership in civil society organizations in Palestine is difficult to measure especially when many of these organizations have suffered from a decrease of membership and ability to provide services due to the dire economic situation, and the organizations themselves have been weakened. The funding of Palestinian NGOs is markedly uneven with a small proportion of NGOs receiving the majority of donor funding. The trends of this distribution are in need of further study especially in the recent era of more bureaucratic and ‘transparent’ and accountable funding procedures from donors as a result of the anti-terrorist financing measures which require a higher level of ‘organizational capacity’ than most organizations are able to demonstrate and an increase of dependency upon external funds which is reaching even the grassroots and local community organizations. Resources, including human, and their distribution within the society in general and the CS sector in particular have also only minimally been studied. Because of the lack of general studies about the impact of CSOs, it is difficult to assess whether CSOs are indeed reaching and representing the most marginalized sectors of the population.

Actual cooperation and partnership between CSOs is limited in terms of service delivery, but collective advocacy and policy initiatives are gaining some effective momentum. There is little research on the impact of the umbrella bodies for CSOs and there is not comprehensive documentation of the relationship between Palestinian CSOs and their international counterparts. As Palestine is in the process of state-building, process-documentation of the development of CSO regulations and policies within the sector and as well as the government should be conducted.

Environment:

Issues of the political rights of Palestinians have and are generating significant research especially in light of the coming elections. The relationship between political parties and CSOs has not been investigated rigorously. There are a host of opinion polls about trust in the Palestinian Authority, but little information about the current status of legal conformity, enforcement and operations of alternative justice. As part of the efforts to reform the PA, much literature has been generated on the issue of corruption. While the CIVICUS indicators were developed with a sovereign state in mind, in the Palestinian case, Israeli government impositions also have to be incorporated and brought to light in detail, though the general effects of the occupation are well documented. Violations of basic freedoms and rights within the PA are tracked by both international and local organizations, but the issue of the implementation of policies to protect citizens’ rights is tricky to assess as it is as of yet

unclear the extent to which these exist or will exist by virtue of the lack of governmental law and order or by governmental sanction.

The socio-economic conditions in the country are well documented as worsening to the present moment, and this negatively affects civil society in general. But these conditions affect different aspects of civil society, its organizations and actors in different ways. These nuances need to be explored. The society is in transition and also host to a large number of varying influences. Socio-cultural norms vary between locales, as do the roles, influence, and positions of CSOs. The question is not only how, but also how do these different CSOs interact, and where does decision-making occur. Levels of tolerance of members of society vary greatly. Attitudes towards women and those of different religions are documented, but more appropriate indicators need to be developed and explored to apply to Palestinian society. Indicators for public-spiritedness in the Palestinian context must also be created and investigated.

The legal environment for CSOs is under significant scrutiny as it is still under development, and in this process civil society exercises a degree of independence which it is hoped will be maintained. While the state is involved in specific projects with CSOs, possibilities for institutionalized relations must be explored. With significant external funding and a poor economic situation, few organizations have explored options of corporate or private sector funding whether locally or internationally.

Values:

Can unified values of CS in Palestine be defined? How are or aren't these values in keeping with standard indicators internationally, and why? While a great number of CSOs promote democracy both locally and nationally, it remains to be seen how democratic and responsive these organizations are internally in actual practice. Understanding whether there is a difference between actual or perceived corruption in the CSO sector will be important for strengthening popular support of CSO work. Is tolerance exercised and promoted by CSOs? How effectively is CS in its initiatives to combat poverty, sustain the environment, and successfully promote gender equality in a context where resistance is everyone's priority? In this context to what extent is peace building and non-violence a manifested value across the different aspects of civil society?

Impact:

As mentioned in the introduction, there are as of yet are no broad studies of the impact of civil society actors nationally or locally. Civil society is still weak in reaching the populace and ascertaining impact is a long-term commitment. Internal advocacy to Palestinian decision making bodies and other stakeholders has only become a recent focus of civil society work. There are no bodies dedicated to monitoring civil society itself within the country and civil society does not often target the private sector. The use and effectiveness of participatory approaches to program design, implementation, and evaluation among some CSOs must be assessed and their responsiveness to community needs and priorities deserves extensive study as does comparative work to ascertain CSO performance in relation to PA and private sector service delivery. In a situation of increased donor dependency, how do CS actors insure sustainability of their efforts? How can CS go about assessing its impact? How can CS make this assessment a meaningful process?

Research Methodology

During the past year BISAN Center for research and Development has undertaken a research of to assess Civil Society in Palestine using a methodology developed by CIVICUS, the World Alliance for Citizen Participation.

Four different methodologies were used:

Literature review: summary of existing research on Civil Society in Palestine

Media review: monitoring of national and local television, radio and print media for four months Nov.2004 -March 2005

Community sampling: survey to 400 households in the West Bank and Gaza Strip.

Regional stakeholder consultations: survey with stakeholders from 200 civil society organizations in the West Bank and Gaza strip, five meetings with stakeholders three in the West Bank and two in the Gaza Strip.

Fact finding: review of statistics, media, unpublished reports related to civil society.

The research was based on a set of indicators classified within four dimensions:

1. Structure of Civil Society
2. Environment of Civil Society
3. Values of Civil Society
4. Impact of Civil Society

Data for indicators was collected through the five methodologies mentioned above depending on the type of indicator.

Research Results

STRUCTURE

1.1 Citizen Participation in Civil Society.

This subdimension examines the extent of citizen involvement in civil society.

The proportion of people that participate in civil society is³:

<i>0</i>	<i>1</i>	<i>2</i>	<i>3</i>
<i>Extremely limited</i>	<i>Limited</i>	<i>Medium</i>	<i>Large</i>

1.1.1. Non-partisan political action	What percentage of people have ever undertaken any form of non-partisan political action (e.g. written a letter to a newspaper, signed a petition, or attended a demonstration)?		
Score 0	Score 1	Score 2	Score 3
A very small minority (less than 10%).	A minority (10% to 30%).	A significant proportion (31% to 65%).	A large majority (more than 65%).

1.1.1 Non-partisan political action.

Around 30% of OPT respondents indicated that they have at one point written a letter to a newspaper, signed a petition or taken part in a protest. The percentage of respondents in GS who took part in such activities was 14%. (Community Sampling Survey)

1.1.2 Charitable giving	What percentage of people donate to charity on a regular basis?		
Score 0	Score 1	Score 2	Score 3
(less than 10%).	ority (10% to 30%).	A significant proportion (31% to 65%).	A large majority (more than 65%).

1.1.2. Charitable giving.

Almost half of the respondents indicated that they donate to charity on a regular basis 48.7%.

³ NAG members should score the sub-dimension in order to cross check the averaged score of the indicators scores for each sub-dimension.

Of all the 402 respondents, only two indicated that they have donated any money to an organization, one of which was to a health organization and the other to a religious one. (Community Sampling Survey)

1.1.3 CSO membership	What percentage of people belong to at least one CSO?		
Score 0	Score 1	Score 2	Score 3
A small minority (less than 30%).	A minority (30% to 50%).	A majority (51% to 65%).	A large majority (more than 65%).

1.1.3. CSO membership.

Over half of the respondents said that they belong to at least one CSO. However there is a considerable difference between the level of membership in the West Bank and in the Gaza Strip. Of those who indicated that they were members of an organization, the types of organizations that they were members of were as follows:

Occupied Palestinian Territories		
Organization Type	Member	Percent of Total
Political Group/Movement	68	15.11%
Trade Union	64	14.22%
Women	42	9.33%
Professional Association	36	8.00%
Family Based	32	7.11%
Sport/Youth	38	8.44%
Student	23	5.11%
Political Issues	23	5.11%
Education	21	4.67%
NGO	17	3.78%
Farmer Group	16	3.56%
Business Organization	14	3.11%
Cultural Organization	13	2.89%
Cooperative	12	2.67%
Hobby	11	2.44%
Health	10	2.22%
Other	10	2.22%

Total	450	100%
--------------	------------	-------------

Respondents are members of a variety of CSOs, and no one type received an overwhelming majority. However, political groups and trade unions had somewhat higher proportions of respondents than other types. Anecdotal evidence suggests that many workers in Gaza who formerly worked in Israel have joined trade unions in order to receive unemployment benefits. This may account for the relatively high number of respondents that indicated that they are union members.

West Bank		
Organization Type	Member	Percent
Political Group/Movement	54	14.29%
Trade Union	41	10.85%
Women	39	10.32%
Professional Association	31	8.20%
Family Based	30	7.94%
Sport/Youth	31	8.20%
Education	21	5.56%
Student	21	5.56%

Farmer	14	3.70%
Business	14	3.70%
NGOs	14	3.70%
Other	47	12.43%
Total	378	

Gaza Strip		
Organization Type	Member	Percent
Trade Union	23	31.94%
Political Group/Movement	14	19.44%
Sport/Youth	7	9.72%
Professional Association	5	6.94%
Cultural Organization	4	5.56%
Women	3	4.17%
NGOs	3	4.17%
Other	14	19.44%
Total	72	

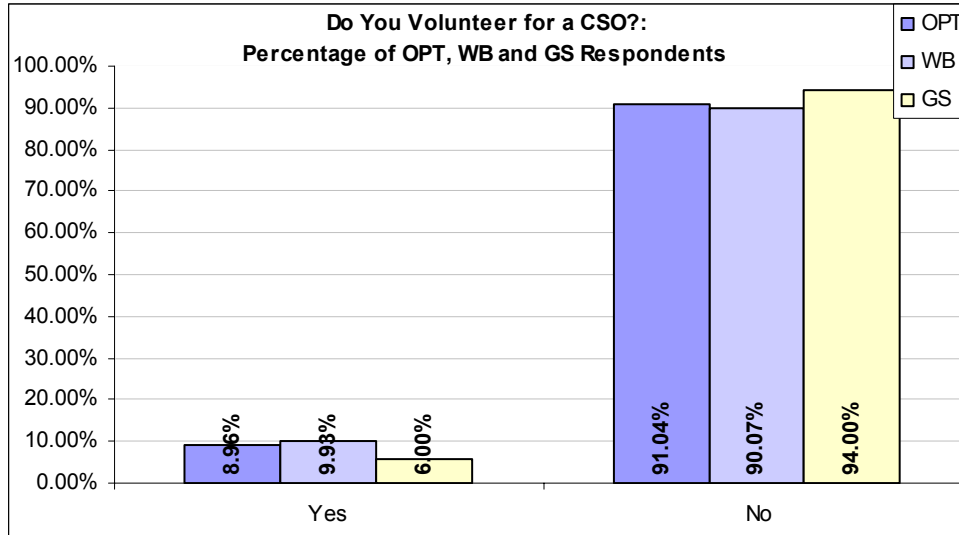

In terms of the differences among the West Bank and Gaza Strip, in both cases respondents indicated that Trade Unions and Political groups/movements were the organizations they were most frequently members of. (Community Sampling Survey)

“...the concept of non-governmental work is still vague in the minds of the Palestinian society and is connected with different degrees of thoughts, mainly thoughts related to the connection with the West and its values, and its connection with the funding bodies, in addition to the thoughts about corruption, favoritism and political factionalism, and many other thoughts that were further confirmed due to the weak relationship between civil society organizations and the popular recourse during the past years.”⁴

1.1.4 Volunteering	What percentage of people undertake volunteer work on a regular basis (at least once a year)?		
Score 0	Score 1	Score 2	Score 3
A very small minority (less than 10%).	A small minority (10% to 30%).	A minority (31% to 50%).	A majority (more than 50%).

1.1.4. Volunteering.

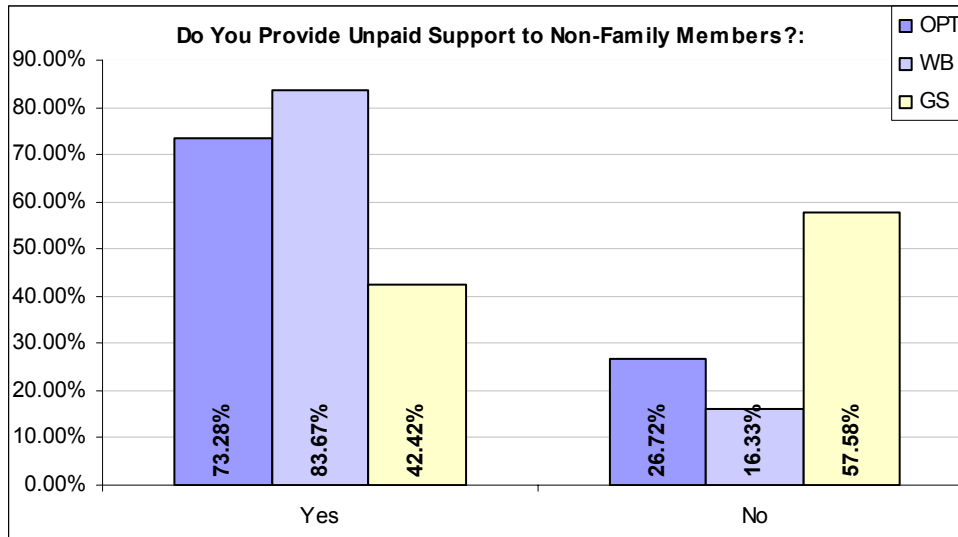

⁴ Abdul-Hadi, Izzat. August, 2000. p.39

More than 90% of respondents indicated that they do not volunteer for a CSO, with little difference between the WB and GS.

Organization Type	# of Volunteers	% of Volunteers
NGO	12	24%
Health	9	18%
Sport/Youth	6	12%
Student	3	6%
Political Issues	3	6%
Education	3	6%
Women	2	4%
Family Based	2	4%
Farmer	2	4%
Cultural Organization	2	4%
Religious or Spiritual Group	2	4%
Other	4	8%
Total	50	100%

A quarter of all volunteers indicated that the type of organization that they volunteered with was an NGO. (Community Sampling Survey)

Only 42% of GS respondents indicated they provide some sort of support to non family members, unpaid, and individually (not through an organization, or association). This is compared with 83.7% of WB respondents who do provide this type of support. (Community Sampling Survey)

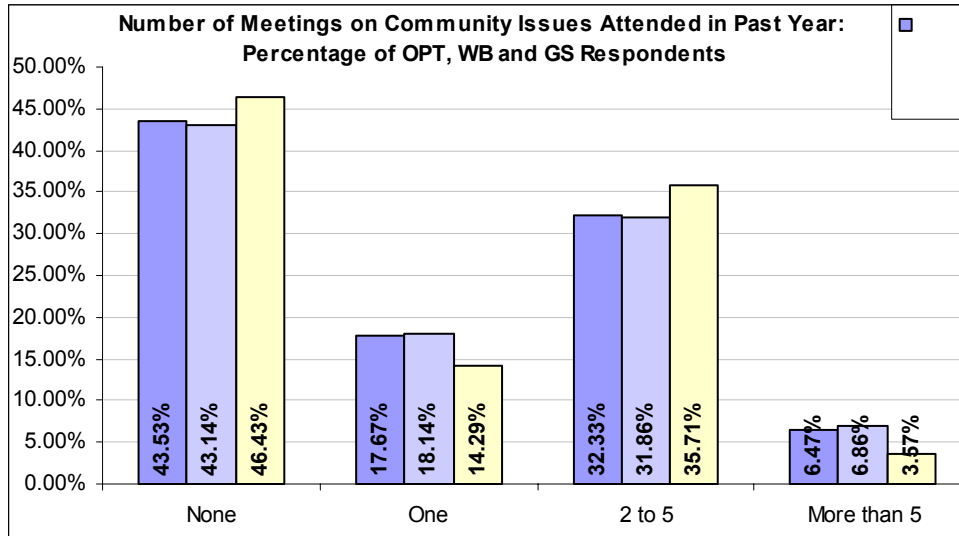

When combining both figures for voluntary work within and outside a CSO. The same results can be noted with a considerable difference between the GS and the WB. Overall only a quarter of respondents indicated that they do not do any type of voluntary work whether within or outside a CSO. (Community Sampling Survey)

1.1.5 Collective community action	What percentage of people have participated in a collective community action within the last year (e.g. attended a community meeting, participated in a community-organised event or a collective effort to solve a community problem)?		
Score 0	Score 1	Score 2	Score 3
A minority (less than 30%).	A minority (30% to 50%)	A majority (51% to 65%).	A large majority (more than 65%)

1.1.5. Community action.

Only 24% of GS respondents indicated that there were any meetings held on community issues in the past year, vs 55% of the WB (47%). Forty five percent of all respondents indicated that there have been no meetings held.

Majority of respondents (43.5%) did not attend any meetings held on community issues. The next highest category: (32.3%) were those that attended two to five meetings, with no difference between the WB and GS. (Community Sampling Survey)

Most of the respondents have not taken part in any community organized activities for the benefit of the community. With 39% of the OPT respondents indicating that they participated in at least one to five activities. Only 7.8% of respondents (8.7% in WB and 2.4% in GS) indicated that they participated in more than five of these community organized activities.

Overall 50.3% of WB and 23% of GS respondents (43.35% overall) indicated that they participated in either a community meeting or volunteer activity during the past year. (Community Sampling Survey)

“Community action assumes greater importance for people who are stateless or under occupation, for the simple reason that they are deprived of the protection of their own government. In addition, occupation...creates an overwhelming demand for services of all kind.”⁵

“...civil society has also assumed the role of opposition, by continuing to press the Palestinian Authority and hold it accountable for everything from corruption to not holding elections...the rationale of civic leaders is simple: whatever structures emerge in Palestine from the current chaos, they will need to adhere to certain fundamental standards and respect the rule of law.”⁶

“The unusual circumstances of this Intifada, where economic and infrastructure problems predominated, contributed to the lack of fully active civil society organizations. Lack of funds, lack of mobility, and lack of access to outside sources of support were important reasons for types and range of local organization.”⁷

The highest membership of CSOs per person is in Ramallah, with an average of 2.13 per respondent. The lowest is in Rafah refugee camp with only one person in every three is a member of any CSO. (Community Sampling Survey)

NGOs Pre-Oslo

- Types of NGOs (pre-Oslo)⁸
 - Charitable & cooperative societies
 - Oldest form
 - “remained constrained by the traditional structure of society.”
 - Popular Organizations

⁸ Barghouthi, Mustafa M.D.

- Women's groups, labor unions, voluntary work movement
- Worked against occupation
- "Factional politics dominate their activities, which has sometimes led to the preference of factional interests over general public interests."
- Developmental orgs
 - Agriculture, health committees
 - "Their principle achievement was in building the infrastructure of resistance to occupation in several ways."
- Research, media and human rights orgs
 - Limited membership
- Special interest groups
 - Disabled etc.

NGOs After Oslo

- In the period 1995-1998⁹
 - Education and health most important sectors of interest to NGOs
 - Lack of NGO action on economic sector

NGOs in 1998

- In 1998, there were 1,150 CSOs including:¹⁰
 - Political groups (18)
 - Unions (252)
 - Charitable Organizations (450)
 - Development groups (80)
 - Human rights/democracy (30)
 - Independent research groups (53)
 - Cultural groups (150)

NGOS in 2000/2001

- In 2001, there were 71 organizations in the WB and GS devoted to women's issues. This represented 12% of CS orgs (39 in WB and 32 in GS)¹¹
- There has been a change in civil society over 10 years from charitable to nationalistic to development oriented¹²
- Based on 2000 survey of NGOs¹³
 - 27.5% work in relief and charity
 - 12% work within specialized professional development field
 - 27.5% worked in civil, democratic and human rights education
 - 66% worked in protecting social and economic rights for women

Role of Religion

- "The current role of religion as a form of civil society is evident in the increasing strength of Hamas in Palestinian communities, the increase in religious practices (and affiliation with mosques), and the development of mosques as centers for support and activity."¹⁴

⁹ Hanafi, Sari. 1999.

¹⁰ "Community Organizing in the West Bank: Opportunities and Obstacles in Civil Society." 2004. p.14

¹¹ "Social Development under Siege; The Al-Aqsa Intifada and the Work of the Palestinian Authority." 2001. p.19

¹² "Community Organizing in the West Bank: Opportunities and Obstacles in Civil Society." 2004. p.14

¹³ Abdul-Hadi, Izzat. August, 2000. p.32

¹⁴ "Community Organizing in the West Bank: Opportunities and Obstacles in Civil Society." 2004. p.13

- “Some see civil society as eroding under the PA, although the existence of vibrant Islamic militant groups is also seen as a different version of civil society.”¹⁵

Internet presence

- “The West Bank and Gaza still hosts a richer variety of professional, research, welfare, charitable, and human rights organizations than most of its neighbors. At least thirty-six NGOs and sixteen research centers have active presences on the Internet.”¹⁶

1.1.7 Partisan Political Action	What percentage of people who participate are members of political parties? What Percentage of people who are members of a political group or movement. Percentage of people who take part in elections (PLC elections)		
Score 0	Score 1	Score 2	Score 3
A small minority (less than 30%).	A minority (30% to 50%)	A majority (51% to 65%).	A large majority (more than 65%)

1.1.7 Partisan Political Action

Membership in a political group or movement:

West Bank		Gaza Strip		OPT	
Number	%	Number	%	Number	%
54	14.29%	14	19.44%	68	15.11%

According to the community survey conducted in the West Bank and Gaza Strip. Around 14% of respondents who indicated that they were members of a civil society organization were a member of a political group or movement. The percentage was around 19.4% of Gaza Strip respondents who are members of a CSO, with 15% for the OPT.

During the last Palestinian Legislative Council elections the percentage of voters was 77.18% of registered voters, with an average of 80.7% for Gaza Strip and 76.7% for the West Bank. Around 80% of the estimated total eligible voters were registered¹⁷.

1.2. Depth of citizen participation

This sub-dimension examines how deep/meaningful is citizen participation in CS, and how frequently/extensively do people engage in CS activities.

The level of people’s engagement in CS activities:

0	1	2	3
<i>A small minority (less than 30%).</i>	<i>A minority (30% to 50%).</i>	<i>A majority (51% to 65%).</i>	<i>A large majority (more than 65%).</i>

1.2.1 Charitable giving	How much (i.e. what percentage of personal income) do people who give to charity on a regular basis donate, on average per year? What forms of charity do people offer? In kind contributions? Donations of money? Donations of goods? Donations of expertise? Resources?

Thirty percent of responses on the types of community volunteering people undertake was tutoring students. In general the level of community volunteering in the West Bank exceeded that in the GS, on average the level of respondents' participation in at least one method of community volunteering in the WB was 15% vs. 6.5% in the GS. (Community Sampling Survey)

Number of Volunteering hours in the last month.	
Mean	11.5
Median	6
Mode	2
Std. Deviation	17.2

The average number of volunteer hours spent by respondents during the past month was 11.5 hours with a standard deviation of 17.2. The median number of hours was 6. (Community Sampling Survey)

1.2.3 CSO membership	What percentage of CSO members belong to more than one CSO? What types of membership and privileges do they enjoy and practice? (Active? Inactive? Paid?)		
Score 0	Score 1	Score 2	Score 3
A small minority (less than 30%)	A minority (30% to 50%)	A majority (51% to 65%).	A large majority (more than 65%)

1.2.3 CSO membership

Most of GS respondents are not members of any CSOs. A further quarter of respondents are members of one CSO, 16% of respondents are members of more than one CSO. Twenty one percent of WB respondents are member of one CSO, while 36% are members of two or more CSOs. (Community Sampling Survey)

Level of membership	OPT	OPT	WB	WB	GS	GS
Not members of any CSO	188	46.77%	128	42.38%	60	60.00%
Members of at least one CSO	214	53.10%	174	57.62%	40	40.00%

1.3. Diversity of civil society participants

This sub-dimension examines how diverse/representative is the civil society arena, whether all social groups participate equitably in civil society, and whether there are any groups that are dominant or excluded.

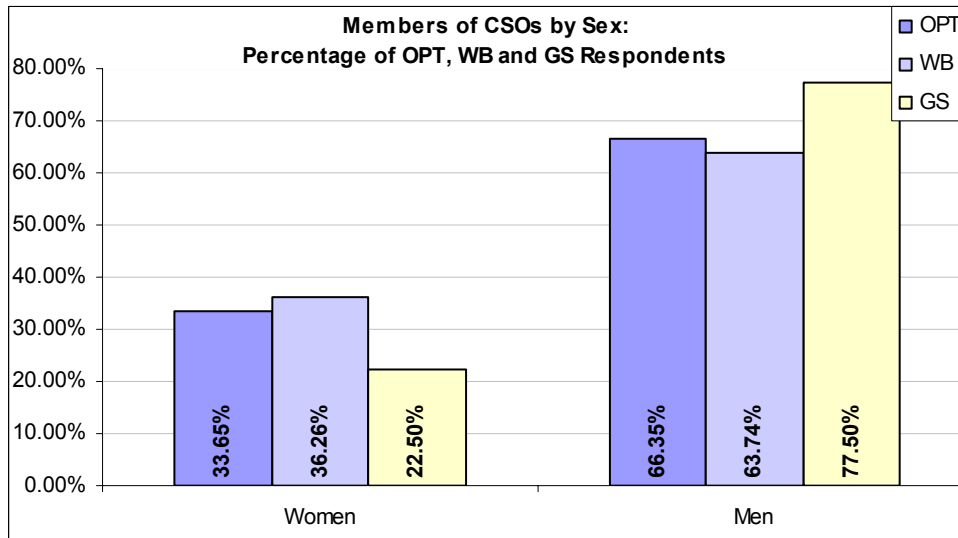

The level of diversity among civil society participants:

0	1	2	3
<i>Marginalized groups are excluded</i>	<i>Marginalized groups are absent</i>	<i>Marginalized groups are under-represented</i>	<i>Marginalized groups are equitably represented</i>

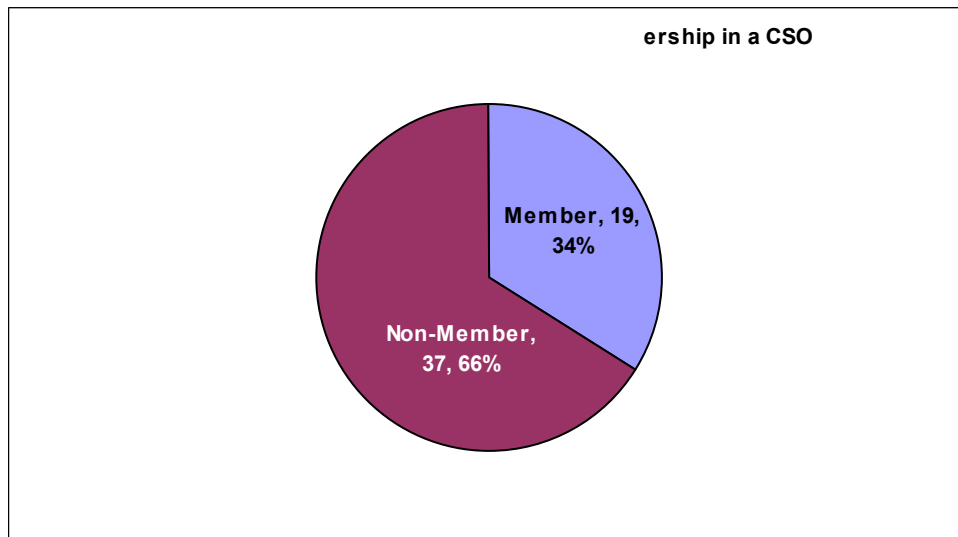

1.3.1 CSO membership	To what extent do CSOs represent all significant social groups (e.g. women, rural dwellers, poor people, minorities)? Which groups dominate? Which are absent/excluded?		
Score 0	Score 1	Score 2	Score 3

Significant social groups are absent / excluded from CSOs.	Significant social groups are largely absent from CSOs	Significant social groups are under-represented in CSOs.	CSOs equitably represent all social groups. No group is noticeably under-represented.
---	---	---	--

1.3.1 CSO membership

Only 35% of female respondents indicated that they are members of a CSO, compared with a national average of 53%, indicating that women are underrepresented as CSO members. Furthermore, there is a regional difference between the WB and GS, with the gap between female and male membership being larger by 15 percentage points in the GS. (Community Sampling Survey)

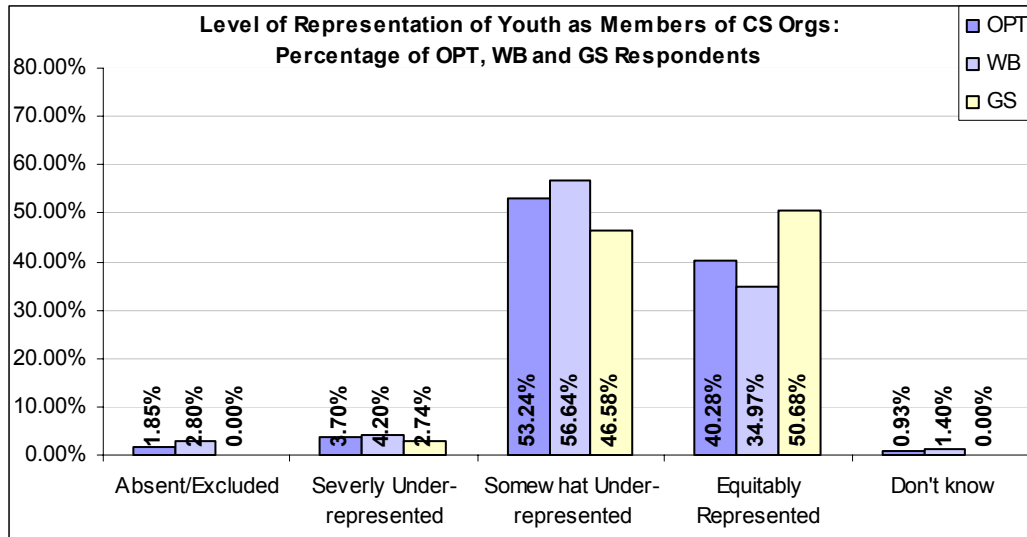

There's no difference between the WB and GS in terms of the proportion of poor respondents who are members of CSOs. (Community Sampling Survey)

Women: Almost three quarters of respondents in OPT said that women were somewhat underrepresented. The second highest category with nearly 20% stated that women were equitably represented as members of CSOs. There was little difference between respondents from the WB and GS. (Regional Stakeholder Consultations)

Farmers: 46.51% of respondents in the OPT stated that farmers were somewhat underrepresented as members of CSOs. The rest of the responses were relatively equally distributed between the other categories ranging from 10% to 15% of OPT respondents. A regional difference can be noticed with 20% of GS respondents reporting that farmers were equitably represented as compared to 5% of WB respondents. In GS nearly 20% said that farmers were absent or excluded from CSOs. (Regional Stakeholder Consultations)

Youth: Almost an equal proportion of respondents stated that youth were either somewhat underrepresented or equitably represented. 50% of GS respondents regarded that youth were equally represented vs. only 35% in the WB. (Regional Stakeholder Consultations)

Workers: 46% of OPT respondents said that workers were somewhat underrepresented. 16.8% of OPT respondents said that workers were absent or excluded which included 22% of GS respondents. At the same time a quarter of GS respondents reported that workers were equitably represented. This shows a lack of consensus about the extent of worker representation in CSOs. (Regional Stakeholder Consultations)

Trade Union Membership

- Most unions belong to the Palestinian General Federation of Trade Unions (PGFTU)
 - Has estimated 95-100,000 workers in WB and 46,500 in GS
 - “The PGFTU estimated that actual organized membership of dues-paying members, included approximately 75% of all Palestinian workers.”¹⁸

¹⁸ “State-Civil Society Relations: Palestine.” 2004. p.2

Poor: The poor had the highest percentage of any group that were absent or excluded from CSO memberships with a total of 44% of OPT respondents. Including 48.2% of WB respondents, and 37% of GS respondents. At the same time one fifth of GS respondents stated that the poor were equitably represented. (Regional Stakeholder Consultations)

In the 'other category' responses were grouped into three reoccurring categories : intellectuals, children and persons with special needs. Of respondents who added one or more of these categories, most stated that members of these three categories were somewhat underrepresented in CSO membership with 50%, 66.7% and 57.1% respectively, however since only a small number of respondents indicated these categories these percentages may not be representative

Nearly 95% of all responses in the OPT indicated that their organizations' were membership based. There is very little difference between the GS and WB. Of responses in the OPT 68.5% indicated that their organizations had paid staff including 63.4% of WB responses and 77.2% of GS responses.

1.3.3 CSO leadership

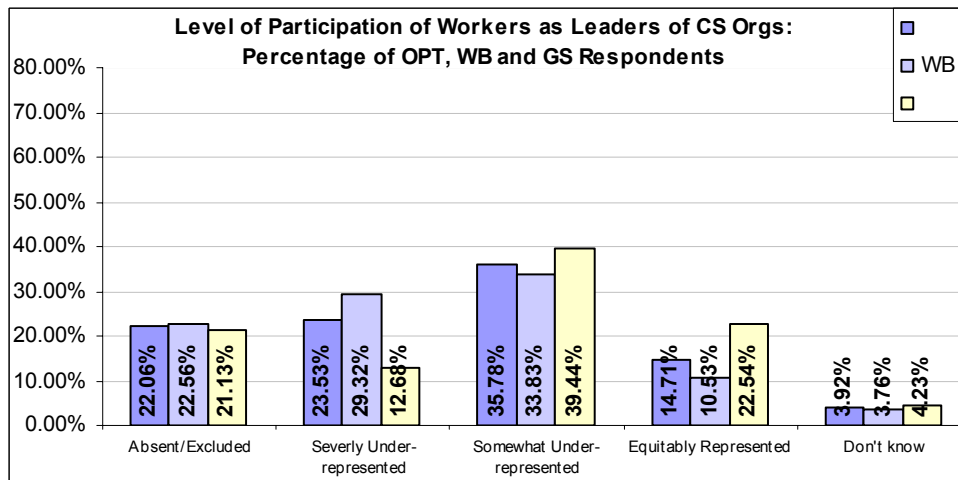

Women: Just over 70% of respondents in OPT said that women were somewhat underrepresented in CSO leadership positions. The second highest category with nearly 14% stated that women were equitably represented at leadership level in CSOs. Its interesting to note that a smaller proportion of GS respondents thought that women were absent/excluded or severely underrepresented in CSO leadership. WB and GS. (Regional Stakeholder Consultations)

Farmers: 41.06% of respondents in the OPT stated that farmers were somewhat underrepresented as leaders of CSOs. A regional difference can be noticed with 9.6% of GS respondents reporting that farmers were severely under represented as compared to 29.8% of WB respondents. In OPT 16.4% said that farmers were absent or excluded from CSOs. (Regional Stakeholder Consultations)

Youth: 97.3% of respondents in the GS thought that youth were either equitably represented or somewhat under represented in CSO leadership. Twice as many respondents in GS as the WB thought that youth were equitably represented (52.0% and 25.6% respectively). 54.4% of all respondents in the OPT thought that youth were somewhat under represented. (Figure 4.A.3.8)

Workers: 35.8 of OPT respondents said that workers were somewhat underrepresented. 22.1% of OPT respondents said that workers were absent or excluded. In the WB 29.3% of respondents thought that workers were severely under represented vs. 12.7% only of GS respondents. IN general GS respondents thought that workers were either equitably or somewhat underrepresented vs a much smaller proportion in the WB that thought that workers were generally somewhat or severely under represented in CSO leadership. (Regional Stakeholder Consultations)

Poor: The poor had the highest percentage of any group that were absent or excluded from CSO memberships with a total of 52.5% of OPT respondents. Including 61.1% of WB respondents, and 36.6% of GS respondents. 26.8% of GS respondents thought that the poor were somewhat underrepresented. (Regional Stakeholder Consultations)

The largest proportion of respondents 35% thought that youth were equitably represented. Women were overwhelmingly thought to be underrepresented by 71.1% of respondents. (Regional Stakeholder Consultations)

69.3% of OPT respondents indicated that their organization elected its leadership¹⁹ by members. The proportion of WB respondents was slightly higher than the GS respondents 71.6% vs. 64.8%. The second highest category was selection through appointment with 22.2% of OPT respondents, 19.1% of WB respondents and 28.2% of GS respondents. Self selection was indicated by only 6.6% of all respondents. (Regional Stakeholder Consultations)

It seems that respondents regard financial resources as either adequate or in adequate with 45% and 38% respectively. It is interesting to note that almost half of the respondents are satisfied with their financial resources. (Regional Stakeholder Consultations)

- “Ever since the Palestinian uprising began in September 2000, Western governments have shrunk from confronting Israel over the strangulation of Palestinian civilian areas and the expansion of settlements. Many Western diplomats are convinced that Israel’s violent response to Palestinian extremism has only encouraged the suicide bombers. But instead of taking Israel to task, their governments have chosen the soft option and poured money into the Palestinian territories. **Palestinian NGOs have been one of the main beneficiaries. They now number well over a thousand, and their income from the West has increased from about \$35 million annually in 1994 to \$120 million in 2002.**”³⁵
- “Increased donor support has been one of the main factors responsible for this ability to cope [with the consequences of the wall on the health sector], helping to cushion the effect of the humanitarian needs created by the Wall and contributing to the continued provision of services and relief activities.”³⁶
- In 1999, 200 donors gave assistance to Palestinian NGOs³⁷

³⁵ “Palestinian Territories: Palestinian Civil Society.” April 2003.

³⁶ Jubran, Joan. August, 2005.

³⁷ Hanafi, Sari. 1999.

- Mostly through local contact in Palestine
- More than \$60 million annually to the NGO sector
- \$240 million 1995-1998
- 10-20% of total international donor assistance to Palestine
- 1995-1998³⁸
 - Education: 23.3% of donor funds (\$56 mil)
 - Health: 19.6% of donor funds (\$50 mil)
 - Agriculture: 7.4% of donor funds (\$7.4 mil)- despite the fact that this is the largest Palestinian economic sector
 - Culture & Social Services: 8% of donor funds (\$20 mil) each
 - Microcredit & private sector: 3.9% of donor funds (\$10 mil)
 - Tourism: .4% of donor funds (\$1 mil)
 - Relief: 1% of donor funds (\$2 mil)
 - Environment: 2.9% of donor funds (\$7 mil)
 - Infrastructure: 2.8% of donor funds (\$7 mil)
 - Human Rights & Democracy: 9.5% of donor funds (\$5 mil) in 1998 alone, but over the 4 years, the average was 4.4%
 - Research: 1.9% of donor funds (\$4.6 mil)
- Donor funding ('95-'98) was lopsided in terms of the West Bank (81% and \$111.5 million) vs. GS (19% and \$26.4 million). This is disproportionate both in terms of population and in terms of need.³⁹
 - Jerusalem = 25% of WB funding
 - Ramallah = 7% of WB funding
 - Bethlehem = 6% of WB funding (disproportionately large vis-à-vis its population)
 - Nablus = 4.8% of WB funding
 - Hebron = 4.8% of WB funding
 - Jenin = 3.8% of WB funding
 - Tulkarem & Qalqilya = marginalized
 - Gaza City = 30% of Gaza Strip funding
- “The most important obstacle facing Palestinian non-governmental organizations is financial in nature. Around 184 non-governmental organizations which is a percentage of (92.2%) of the total sample pointed to the fact that they suffer from major financial difficulties ranging in its intensity from one organization to the other. It was also noted throughout the research that charitable organizations and sport clubs are among the ones that suffer most from financial crisis on one hand, and professional organizations suffering the least. After the creation of the Palestinian National Authority, it undertook many responsibilities that were executed by non-governmental organizations, hence, weakening the funding for such organizations.”⁴⁰
- “The World Bank’s statistics state that the extent of total funding for the non-governmental sector **prior to the Oslo Agreement in 1993 ranged between 120-180 million US dollars** per year, whereas this number **decreased to around 60 million US dollars per year** after the inception of the Palestinian National Authority... This crisis becomes worse in the midst of the developing demand on social services, mainly the primary sectors of health, education, early education, agriculture, loans and training and others. A study conducted by the Palestinian Non-Governmental Organizations Network revealed that the non-governmental sector is still offering basic services in different development sectors specifically first aid, early education, water, agriculture and training, etc. The non-governmental sector is still offering basic services in Jerusalem areas that are not under the Palestinian National

³⁸ Hanafi, Sari, 1999.

³⁹ Hanafi, Sari, 1999.

⁴⁰ Abdul-Hadi, Izzat. August, 2000. p.37

Authority's administration despite the severe lack of funding among the Palestinian non-governmental organizations."⁴¹

- Funding peaked (before the establishment of the PA) between 1990-1992 when the NGO sector received \$250 million per year⁴²
- "Thus, the incursions of winter/spring 2002, the road closures and the limited access to the outside had a debilitating effect on the Awata community both in terms of income and social services, but also on social outreach and community-building. Informal organizations that existed before the Intafada were largely inactive. The fact that few civic organizations or activities existed was attributed by some informants to the fact that they were concerned they would be required to donate money that they didn't have. For example, one of the nursery schools had a leaky roof during the winter of 2002/2003 but parents didn't organize a committee to repair it because they didn't have the money to contribute."⁴³
- "Constraints on the operation, and on the establishment of other similar [CSO] groups seemed to be largely financial as locals could not afford to share their severely limited projects. Alienation from the larger community, depression, and anxiety were also cited as common with the understandable consequence that participation in civic groups was not sought out as much as before the Intifada. Many of the problems in the villages (checkpoints, closures, inadequate electricity grids and sewage disposal) also required power or resources unavailable to local groups."⁴⁴

Citizens are endowed with substantial political rights and meaningful opportunities for political participation. There are minor and isolated restrictions on the full freedom of citizens' political rights and their participation in political processes.	freedom and choice to exercise their political rights and meaningfully participate in political processes.

2.1.1. Political rights

Palestinians living in the West Bank and Gaza Strip are living under military occupation since 1967. For the past 38 years are living under strong restrictions on their political rights' as citizens.

Since 1995 Palestinians have been able to take part in legislative and presidential elections. Political party activity and membership is restricted to parties that have indicated their support of the peace process and Oslo agreements.

Hamas has been allowed to take part in the legislative council elections undertaken on January 25, 2006.

However Palestinians' basic human rights remain violated such as access to education, health, housing as well restrictions on movement. Violations of international laws continue such as killings, house demolitions, confiscation of lands.

There is practically no movement between the Gaza strip and the West Bank. A Wall is being built in the West Bank that will enclose most of its residents behind 8 meter walls, while keeping agricultural land, water resources and villages outside the wall in certain areas.

2.1.2 Political competition	What are the main characteristics of the party system in terms of number of parties, ideological spectrum, institutionalisation and party competition?		
Score 0	Score 1	Score 2	Score 3

2.1.3. Rule of law

- Palestinian Judicial Higher Council was created in 2000⁴⁶
- PA appointed judicial positions including

⁴⁵ "Palestinian Organizations and Parties." MidEast Web: <http://www.mideastweb.org/palestineparties.htm> Accessed 12-12-2004

⁴⁶ "Social Development under Siege; The Al-Aqsa Intifada and the Work of the Palestinian Authority." 2001. p.4

- Attorney General
 - Supreme Judge
 - Chief justice for the Higher Court in Gaza⁴⁷
- There has been an increase in the number of judges trying cases⁴⁸
- Many Palestinian laws have been passed (43 by 2001)⁴⁹
- Difficult ratification process for laws⁵⁰
- Remaining problems:
 - Failure of execution of endorsed laws
 - Numerous presidential decrees
 - Creation of military and national security courts⁵¹
- “Lack of sovereignty in the judicial context means multiple laws and legal systems in the West Bank and Gaza, causing withering complexity in legal procedures and interpretations.” There is a challenge to unify laws. Laws include:
 - Jordanian laws written between ’48-’67 in the West Bank
 - Egyptian laws written between ’48-’67 in the Gaza Strip
 - British Emergency Laws ’45-’48⁵²
- The PLC is overloaded⁵³
- “The refusal of the executive authority to implement the decisions of the courts especially the decisions taken by the court of higher justice concerning freeing political prisoners. The Rights of Handicapped Law and the Civil Service Law have also not been executed. This is justified in some cases by the claim that these laws need bylaws explaining methods to implement them like the law concerning the right of the handicapped, they say also that financial resources are needed in order to implement other laws like the civil service law.”⁵⁴
- Judicial authority lacks human and financial resources
 - In 2000, there was 1 judge for population of 99,430 in WB
 - 1 judge for population of 72,471 in GS⁵⁵
- “In general in Palestinian society, both men and women, have a negative attitude toward the law. Laws are characterized as a means of oppression used for creating tensions due to the political turmoil that exists.”⁵⁶
- “Some criticisms have also been directed at the refusal of PA officials to accept all court orders. The problem has been most acute with extremely sensitive political cases—for example, those in which PA security forces have arrested members of organizations involved

2.1.7 Separation of powers within the government

- Financing of the Judicial Higher Council is independent of the legislative and executive branches of the PA⁶⁴
- “The main shortcomings of 2000 include...lack of clarity between the different branches of government...”⁶⁵
- Lack of balance between legislative, judicial and executive authorities—weakness in principle of separating them in terms of legal concepts and practice⁶⁶
- The executive authority made changes in laws ratified by the legislative council⁶⁷
- Many presidential decrees have legislative significance
 - Demolish or modify current laws or expand their mandate from the WB to GS or vice-versa
 - This is interference from the executive authority in affairs of the legislative authority⁶⁸
- The Basic Law guarantees the independence of the judiciary—it states that Palestine is a Parliamentary democracy built on a separation of powers.⁶⁹
- “The Palestinian Authority institutions exercise their influence, and at times actively intervene in the work of the legislature. This is one symptom of the more general case of the absence of the separation of powers in Palestine. The (former) Chairman of the PLC has very close ties with the executive authority, and therefore he is unable (or unwilling) to resist pressures from the government or presidency. Add to this the fact that the majority of PLC members are associated with the executive authority. This situation undermines the spirit of the separation of powers, and it paves the way for unwarranted interventions. Many drafts get altered and delayed because of calculations outside the walls of the PLC, and beyond the reach of the pertinent committee.” (Dr. Azmi Shuaibi)⁷⁰

- No laws exist protecting rights of striking workers⁷⁶
- “In the six years since its establishment the Palestinian Authority (PA) has detained dozens of human rights defenders, journalists, religious figures, writers, governmental officials, trade unionists and academics solely for exercising their legitimate right to freedom of expression. In the past year alone, Amnesty International has documented the arrest and detention of at least 13 prisoners of conscious. Many have been detained after criticizing the policies of the PA or the conduct of the peace negotiations with Israel. Some were arrested in connection with events happening elsewhere in the world, such as the 1998 air strikes by the United States of America and the United Kingdom on Iraq. Most were held outside any legal framework, often incommunicado, and released without charge after a few days or weeks, and, in some cases, months.”⁷⁷
- “In November 1998 the PA issues Presidential Decree No. 3 concerning the Strengthening of National Unity and the Prohibition of Incitement. Even though this decree has the force of law, it was never passed by the Palestinian Legislative Council. The Wye Memorandum, signed the previous month by Israel and the PLO, had stated that the Palestinian side would ‘issue a decree prohibiting all forms of incitement to violence or terror.’ The passing of the decree was one of the conditions which the PLO had to meet in order to secure Israel’s further redeployment from West Bank territory and the release of Palestinian prisoners from Israeli jails. The decree goes far beyond prohibiting ‘violence or terror’ and punishes a broad range of speech, including incitement to ‘strife’ (*fitna*) which is not defined further and could be used to prohibit forms of expression which would be protected under international human rights law, as could the prohibition of incitement to breach agreements signed between the PLO and foreign states.”⁷⁸
- “Many other laws in force in the areas under PA jurisdiction, inherited from the British Mandate Period as well as the periods of Jordanian and Egyptian administration, curtail the right to freedom of expression. However, one of the hallmarks of human rights violations by the PA, including violations of the right to freedom of expression, is that such violations usually routinely occur outside any legal framework whatsoever.”⁷⁹

- “Many privately owned media also survive, despite efforts of the Authority to clamp down on them.”⁸⁵
- 1995 Press Law
 - “no security agency has any right to question, interrogate, detain, incarcerate or arrest a journalist on matters pertaining to his work.”
 - Does not provide for formal censorship, but Art. 37 prohibits the publication of articles that cause harm to national unity⁸⁶
- Ministry of Information licenses the media and the General Intelligence Directorate has established a Bureau of Press Information to accredit and monitor foreign media⁸⁷
- “...PA security forces have sometimes shut down broadcasters for political reasons. The incident receiving the most international attention involved Al-Quds Educational Television, which was broadcasting a session of the PLC. The remarkably frank and sometimes heated tone of the PLC discussion was apparently too much for PA leaders to bear, and in May 1997 the director was detained in Ramallah until the broadcasts ceased. Attracting much less attention was the closure of a radio station after it broadcast caustic comments by Umar Assaf, a leader of a wildcat teachers’ strike and member of the Central Committee for the Popular Front for the Liberation of Palestine. On none of the occasions when broadcasters or journalists ere detained o shut down did the authorities cite any legal basis for their actions. They simply proceeded on their interpretation of presidential will or national interest.”⁸⁸
- “One of the first laws to be adopted by the PA was the Press and Publications Law of 1995. It did not benefit from scrutiny by the Palestinian Legislative Council, which had not yet been elected. This law regulated every publication produced or imported into areas under PA jurisdiction and gives the PA very wide powers to regulate the media as well as research centers, news agencies, libraries and other institutions which process and disseminate information. While Article 2 reaffirms the principles of “freedom of the press and printing” and freedom of opinion and expression “in the form of speech, writing, photographs or drawing for the purposes of expression and information”, other articles of the same law

⁸⁵ “State-Civil Society Relations: Palestine.” 2004. p.1

⁸⁶ “State-Civil Society Relations: Palestine.” 2004. p.1

⁸⁷ “State-Civil Society Relations: Palestine.” 2004. p.1

⁸⁸ Brown, Nathan J. 2002. p.30

undermine these freedoms. For example, article 37 prohibits the publication of a whole range of information, including any information considered harmful to religion or morality, or which may harm national unity, or which shakes confidence in the national currency. Such broadly defined provisions are open to abuse. The fact that virtually all violations of the Press Publications Law are punishable by imprisonment means that the law could be used to detain prisoners of conscience.”⁸⁹

- “Amnesty International is not aware of a single case where a prisoner of conscience has been arrested and his detention justified on the basis of the Press and Publications Law or the Anti-Incitement Decree. The various Palestinian security forces arrest and detain most political prisoners, including prisoners of conscience, without any apparent reference to local Palestinian law.”⁹⁰
- “To avoid the kinds of abuses described above, some Palestinian journalists now admit that they practice self-censorship, either by modifying the manner in which they report a story or not reporting or commenting on certain topics at all. Even if a journalist is prepared to take risks, his or her editor may not be willing to carry the responsibility of authorizing publication of a critical article. This is not just a dilemma for journalists, but also for other activists in civil society as well, some of whom have nevertheless continued to speak out on controversial issues knowing that they may face arrest or other forms of harassment as a result.”⁹¹

2.6. State-civil society relations

This sub- dimension examines to what extent is the existing legal environment enabling or disabling to civil society

Relations between State and Civil society are:

0	1	2	3
<i>Disabling</i>	<i>Somewhat disabling</i>	<i>Somewhat enabling</i>	<i>Enabling</i>

2.6.1. Autonomy		To what extent can civil society exist and function independently of the state? To what extent are CSOs free to operate without excessive government interference? Is government oversight reasonably designed and limited to protect legitimate public interests?	
Score 0	Score 1	Score 2	Score 3
The state controls civil society.	CSOs are subject to frequent unwarranted interference in their operations.	The state accepts the existence of an independent civil society but CSOs are subject to occasional unwarranted government interference.	CSOs operate freely. They are subject only to reasonable oversight linked to clear and legitimate public interests.

2.6.1. Autonomy

There is a lack of consensus about the level of state interference in CS activities. Of overall respondents in the OPT 37.2% indicated that the government sometimes unduly interferes in CSO activities. With a large percentage of GS respondents (33%) indicating that the state rarely interferes vs. 22% who think that the interferences is frequent. It is important to note that 20%, (26% WB, 8.22% GS) believe that the state never unduly interferes in CS activities. (Regional Stakeholder Consultations)

Areas of state interference in CS	Frequency	Percentage
-----------------------------------	-----------	------------

General monitoring of CSOs by PA and security forces	25	18.21%
General interference in CSO activities	24	17.92%
NGO law (MoI instead of MoJ)	13	9.70%
CSO registration	13	9.70%
Creation of NGO affairs group	11	8.21%
PA uses Fateh to control orgs	8	5.97%
Censorship of PA. criticism	7	5.22%
No internal monitoring at Ministry of Interior	6	4.48%
Monitoring of CSO internal elections	6	4.48%
Monitoring of CSO Accounts	5	3.73%
Favoritism for PA-related NGOs	4	2.99%
PA tries to control Islamic orgs	4	2.99%
Co-opting of CSOs	3	2.24%
Interference in Human Rights orgs activities	3	2.24%
Anti-Terrorism Certificate	2	1.49%
Total	134	

- CSOs were monitored by the PA and by security forces according to 25% of respondents: one charitable organization was asked to send a copy of its annual budget to the intelligence forces. This is illegal since the law states that the responsible institution is the Ministry of Interior. In a second example, security forces obstructed CSO activities by directly requesting financial or administrative files.
- Interference in elections: Security forces interfere in the internal elections of CSOs.
- CSO registration: The PA assigned the ministry of Interior the duty of registering NGOs rather than the ministry of Justice as originally proposed by Civil Society members when the NGO law was first drafted. Certain CSOs were required to obtain approval from additional ministries or public authorities such as the Ministry of Communication before getting registration. For some of the CSOs interviewed the registration process took 2 to 3 years.
- The NGO Forum Group was created by the PA as a monitoring body for Civil society and specifically NGOs.
- Monitoring of CSO accounts: external funding received by certain NGOs was frozen by the PA for several months.

(Regional Stakeholder Consultations)

- The Ministry of Non-Governmental Organizations Affairs is housed in the executive branch¹⁰¹
- "...local areas of conflict in the PA currently include legitimacy, as some organizations represent themselves as political alternative to the PA; competition, as some organizations overlap with PA organs, including the trade union federation, while others are seen as undermining the role of new ministries; and autonomy, as the PA has moved toward restrictive legislation of independent organizations."¹⁰²
- "Today, the PNA finds itself in the driving seat and one of the problems is that many Palestinians regard the PNA not only as authoritarian in its own rights but also in a sense authoritarian at the bidding of the Israeli government and so the PNA has to try to maintain a position which is doubly-authoritarian. In other words, the PNA is authoritarian in its own

¹⁰¹ "Palestine in Brief." 2004. p.3

¹⁰² "Community Organizing in the West Bank: Opportunities and Obstacles in Civil Society." 2004. p.15

view of how patronage works, how you don't cross the particular powerful figures of the PNA, at the same time they are authoritarian because they know they've got the Israeli government breathing down their neck and that puts them in many situations in a kind of confrontation with civil society organizations. It is clear that the PA wants to bend the rules. They want to use coercion, torture, imprisonment, various human rights abuses have been associated with them. Even beyond that, the notion of controlling the education system, controlling the medical infrastructure and all these areas where the state begins to crystallize—regardless of people's ambitions within the PA—there is a notion that these should be the state's responsibilities but until now they have been run by CSOs and so the state tries to encroach upon them. One has to deal with a number of levels, one is the natural logic of state creation that wants to gobble up CSOs because many of those service organizations were the kind of services the state should provide. Secondly, you got this desire to extend patronage with the notion of political control by people at the top. Thirdly, you have the notion of being in awareness of the Israeli view behind you as you watch Palestinian civil society emerging—not always in friendly ways, understandably, towards the Israelis or towards those who are seen as doing their biddings.”¹⁰³

2.6.2. Dialogue	To what extent does the state dialogue with civil society? How inclusive and institutionalised are the terms and rules of engagement, if they exist?		
Score 0	Score 1	Score 2	Score 3
There is no meaningful dialogue between civil society and the state.	The state only seeks to dialogue with a small sub-set of CSOs on an ad hoc basis.	The state dialogues with a relatively broad range of CSOs but on a largely ad hoc basis.	Mechanisms are in place to facilitate systematic dialogue between the state and a broad and diverse range of CSOs.

2.6.2. Dialogue

More than half of respondents indicated that the level of dialogue between state and civil society was limited. A further third believed that it was moderate. There was no difference between the WB and GS, and only 11.7% believed that no dialogue existed.

¹⁰³ “Interview with Charles Tripp.” *Civil Society; Democratization in the Middle East*. Vol. 8, Issue 85. January 1999.

2.6.3 Co-operation/ support	How narrow/broad is the range of CSOs that receive state resources (in the form of grants, contracts, etc.)? How significant are these resources (e.g. compared to CSOs' other sources of income)?		
Score 0	Score 1	Score 2	Score 3

¹¹¹ Abdul-Hadi, Izzat. August, 2000. p.40

¹¹² Abdul-Hadi, Izzat. August, 2000. p.40

A vast majority of respondents stated that there were one or two examples of campaigns, actions or programs undertaken by Civil society to promote democracy in the past year. An additional twenty percent indicated that there were many examples of these actions during the past year. (Regional Stakeholder Consultations)

Activity	Frequency	Percentage
Demonstrations	55	27.36%
Campaigns	47	23.38%
Workshops	27	13.43%
Lobbying	15	7.46%
Meetings	14	6.97%
Committees	10	4.98%
Civic Education	9	4.48%
Sit-in	9	4.48%
Other	15	7.46%
Total	201	100.00%

Of the 216 stakeholders interviewed, there were 201 examples of Civil Society actions to promote democracy. The main activities included demonstrations, campaigns, workshops and lobbying. (Regional Stakeholder Consultations)

Issue Area	Frequency	Percentage
Separation Wall	59	39.07%
Democracy	18	11.92%
Occupation	12	7.95%
Elections	10	6.62%
Prisoners	8	5.30%
Women's Election Quota	6	3.97%
Other	38	25.17%
Total	151	100.00%

Respondents identified 32 different issues that Civil Society has taken a position on, and promoted through various types of activities. The most important of those was the separation (apartheid) wall being built by the Israeli government. The actions undertaken by Civil Society were mainly demonstrations and lobbying activities to stop, to dismantle and/or change the route of the wall being built to minimize the destruction and confiscation of lands. A large number of workshops and lectures were held to educate women, youth and general public on democracy and human rights issues. Around 4% of responses indicated women's quota in elections as one of the main civil society initiatives around which many lobbying and awareness activities were undertaken. (Regional Stakeholder Consultations)

CS role in promoting democracy	OPT	WB	GS
Insignificant	19.34%	18.57%	20.83%
Limited	19.34%	21.43%	15.28%
Moderate	47.64%	47.86%	47.22%
Significant	13.68%	12.14%	16.67%
Do Not Know	0.00%	0.00%	0.00%

Twenty percent of the respondents with little variance between WB and GS, indicated that Civil Society's role in promoting democracy has been insignificant. While almost half of the respondents considered CSOs role to be moderate. (Regional Stakeholder Consultations)

- PNGO & other NGOs drafted a memorandum of principles proposing amendments to the 1995 Palestinian election law dealing with the threshold percentage, women and elections as well as the structure and integrity of elections.¹¹³
- Democracy and Workers Rights Center “used an emergency job creation scheme to organize workers in Gaza and encourage democracy on the shop floor. This has gone some way towards breaking the grip of the two main labor federations, which are both controlled by the political apparatus of Yasser Arafat.”¹¹⁴
- “Since the earliest days of the Palestinian Authority, a varied group of Palestinians has sought to lay the practical foundation for Palestinian statehood through the construction of strong institutions with clear (and generally liberal) legal bases. These efforts have been sometimes frustrated by the patterns of governance favored by the Palestinian leadership and by the restrictions and priorities imposed by the process of negotiating a settlement with Israel. Out of this struggle a diverse coalition of Palestinian reformers has arisen. Some of the reformers are members of the elected Palestinian Legislative Council (PLC) and have sought to use their positions to build a solid legal basis for institutions such as the Palestinian judiciary and civil service. A second group of reformers consists of prominent NGO leaders, who have both cooperated and competed in proposing various reforms. A third group is made up of intellectuals, especially those associated with universities, who have developed many of their own proposals. A fourth group consists of political party activists who have provided some support for reform, though it has often been tangential to their main agendas.”¹¹⁵ 7 areas of reform have arisen:
 - Constitution writing
 - Defining the relationship between the PLO and the PNA
 - Public finances
 - Rule of Law and Judicial Reform
 - Corruption
 - The structure and practices of the security services
 - Elections and local governance
- “Reformers have not been without impact. They have often been dominant in discussions among intellectuals, and they have exerted real influence on the formal legal framework of the Palestinian Authority. But they have had far less success in translating these achievements into actual reforms in Palestinian governance. In general, the accomplishments of the reformers have been real but limited but the patterns that have governed the Palestinian Authority since the beginning: the leadership is pliant, attempting to please all parties at once most procedures are ad hoc and unclear; those rules that are clear are still bent and even broken; and chains of command and responsibility are obscure. PA reform has often foundered precisely because of the problems reformers have sought to overcome: the weak institutionalization and legal ambiguities that afflict all PA operations.”¹¹⁶

Palestinian Authority put in place. An annual budget was prepared and published. A clear legal procedure was developed for presenting and approving this budget, and critics hammered away at PA fiscal practices, obtaining a series of concessions. In that sense, a clear institutional and legal basis was laid for making finances dependent less on personalities and ad hoc decisions and more on well-established institutions and procedures. As an example of what they had learned, reformers were able to build fairly detailed fiscal provisions into the draft constitution for statehood. Yet the main problem came in implementing the procedures that reformers had won.”¹²²

Government Transparency

Examples of CS actions to promote Gov. Transparency	OPT	WB	GS
None	37.56%	38.35%	36.11%
1-2 examples	29.76%	24.81%	38.89%
Several examples	2.93%	3.76%	1.39%
Many examples	1.95%	0.75%	4.17%
Do Not Know	27.80%	32.33%	19.44%

Of all respondents 38% indicated that they could think of no examples of actions, campaigns or programs to promote Government transparency in the past year. (Regional Stakeholder Consultations)

Activity	Freq	Percentage
Workshop	11	21.15%
Demonstration	8	15.38%
Conference	7	13.46%
Other	26	50.00%
Total	52	100.00%

	Frequency	Percentage
NGOs	30	58.82%
CSOs	6	11.76%
PNGO	5	9.80%
Ngos and Gos	3	5.88%
Other	7	13.73%
Total	51	100.00%

In total there were 52 examples of Civil society actions to promote transparency and were mainly workshops, demonstrations and conferences, that were undertaken by CSOs, or joint NGO and governmental committees. (Regional Stakeholder Consultations)

Issue	Frequency	Percentage
Transparency	22	47.83%
Corruption	9	19.57%
Rule of Law	5	10.87%
Economic	3	6.52%
Other	7	15.22%
Total	46	100.00%

The main issues tackled was Government transparency and accountability, corruption within government institutions, reform issues, and economic concerns such as price hikes, and fees. (Regional Stakeholder Consultations)

¹²² Brown, Nathan J. 2002. p.27

Civil Society's role	OPT	WB	GS
Insignificant	49.77%	48.94%	51.39%
Limited	19.25%	21.99%	13.89%

Do Not Know	7.04%	7.09%	6.94%

There is a lack of consensus among respondents on the role of Civil Society in promoting in gender equality

at the societal level. An equal proportion of respondents think that their role is either insignificant or moderate. A large proportion, (43%) of GS respondents, believe that their role is insignificant. (Regional Stakeholder Consultations)

- PNGO & other NGOs drafted a memorandum of principles proposing amendments to the 1995 Palestinian election law dealing with the threshold percentage, **women** and elections as well as the structure and integrity of elections.¹²⁵
- “Historically, the charitable nature of Palestinian women’s organizations distanced them from embarking on any sort of challenge of gender-bias. Their role was seen within the same traditional social welfare charitable nature. Through the years, women’s organizations viewed their struggle as part of the national aspiration towards independence and that social equality was intertwined with political independence. Only in the later 80’s and more so in the post Oslo period did Palestinian women organizations perceive the utmost necessity for a social agenda parallel and of equal importance to the political agenda.”¹²⁶
- “Examples of effort in this area include the work of the women’s technical committees and other women groups such as the union of working women committees and the women committees for social work and others in lobbying and pressuring legislative council members for laws affecting women. Also, the Palestinian model parliament was a step towards lobbying and consciousness awareness of women rights and a way of effecting the policy making machinery. Women groups have also been working on increasing women’s representation in different local councils and municipalities. Their work was guided by the need to not only increase the number of women in politics but also to toster [sic] their quality participation and its effectiveness. Topics such as quotas and electoral systems have been areas Palestinian women’s groups have been working on.”¹²⁷
- “The creation of women coalitions to effect policies and strategies during this vulnerable political social and economic development and state reconstruction period. A good model is the Palestinian coalition for women’s health. Established in 1995 as a professional platform consisting of women practitioners working in the field of women’s health, it plays an important role in promoting women’s health (from conception to death) through campaigns, research, training, information exchanges, and advocacy for policy formulation on women’s health. Thus, it plays a very important role in the struggle for sustainable and equitable human development.”¹²⁸

3.6. Poverty eradication

Examples of CS actions to eradicate poverty	OPT	WB	GS
None	25.12%	25.19%	25.00%
1-2 examples	48.79%	48.89%	48.61%
Several examples	1.45%	1.48%	1.39%
Many examples	6.28%	2.22%	13.89%
Do Not Know	18.36%	22.22%	11.11%

Around half of the respondents could think of one to two examples of CS involvement in poverty eradication. (Regional Stakeholder Consultations)

Organization (Who)	Frequency	Percentage
PPAP	34	24.46%
NGOs	34	24.46%
CSOs	26	18.71%
UNRWA	8	5.76%
UNDP	8	5.76%
Religious Org.	8	5.76%
Labor Unions	8	5.76%
Women's orgs	7	5.04%
Other	6	4.32%
Total	139	

UNDP undertook a Poverty Assessment process in all regions of the WB and GS. During regional meetings Poverty eradication committees were formed in each governorate that included various CS actors, and governmental organizations and ministries. The result of the program had been a Report on needs assessment of poverty and priority setting. (Regional Stakeholder Consultations) During the second intifadah and the tight closure imposed on the WB and GS, UNDP initiated a work for food program in collaboration with local councils, ngos, and ministries. Unemployed workers who were unable to reach their former workplaces inside Israel were given daily jobs in return for food aid.

From 2001 through 2003 various areas in the WB were under continuous closure and/or curfews during which food and financial aid was distributed to residents mainly in urban and refugee camps. Food packages were mainly distributed by international aid organizations. Religious organizations such Al Zakat provided financial support to poor families.

Activity	Frequency	Percentage
General activities	21	15.56%
Work for food	15	11.11%
Employment-generation	13	9.63%
Workshops	10	7.41%
Food Aid	9	6.67%
Priority setting	9	6.67%
In-kind support	8	5.93%
Poverty Eradication day	7	5.19%
Research	6	4.44%
Meetings/lectures	5	3.70%
Campaigning on unemployment	5	3.70%
Demonstrations	5	3.70%
Financial aid (students)	4	2.96%
Fundraising	4	2.96%
Emergency activities	3	2.22%
Other	11	8.15%
Total	135	100.00%

Only ten percent of poverty eradication activities cited by respondents were employment generation projects undertaken by UNDP or Palestinian NGOs such as PARC, Faten and others. The respondents did not mention certain large poverty eradication programs such as those undertaken by UNRWA and Welfare Association. (Regional Stakeholder Consultations)

CS role in poverty eradication	OPT	WB	GS
Insignificant	44.19%	42.96%	46.58%
Limited	23.72%	26.76%	17.81%
Moderate	21.86%	22.54%	20.55%
Significant	7.91%	6.34%	10.96%
Do Not Know	2.33%	1.41%	4.11%

Most respondents 45% said that they thought CS role in poverty eradication was insignificant, with no differences between the WB and GS. With less than ten percent saying that they thought CS role was significant. (Regional Stakeholder Consultations)

This is due to a structural problem causing poverty rather than a transitional situation. Unemployment figures in the WB and GS have been over 60% since Israel imposed its closure of the OPT. The political and violent situation during the past three years have prevented any establishment of real solutions to the employment problem. Invasions, bombing, closures and curfews created a situation of instability that prevented any real planning for economic development in the OPT. The high risk and danger associated with doing business has also prevented investors both local and expatriates from starting new enterprises since the second intifadah started in 2000.

3.7. Environmental sustainability

This sub-dimension examines to what extent does the civil society practice and promote environmental sustainability.

The extent to which civil society practices and promotes environmental sustainability is:

Do Not Know	18.69%	19.15%	17.81%

Less than six percent of respondents said that they could think of several or many examples of CS actions, campaigns or programs during the last year to protect the environment.

Actor	Frequency	Percentage
NGOs	48	52.17%
CSOs	15	16.30%
Municipality	8	8.70%
UNDP	4	4.35%
PENGON	3	3.26%
CHF	3	3.26%
WEDO	3	3.26%
Other	8	8.70%
Total	92	100.00%

Most activities to protect the environment were implemented by NGOs. These were mainly awareness campaigns and cleaning days. Youth were the main target of these activities. Beautification of cities and villages were also among the most common examples. These activities were undertaken by municipalities, local councils, youth groups, and local committees. There were some activities such as demonstrations and lobbying activities to protest Israeli pollution of the Palestinian environment either from illegal factories on settlements in the WB and GS that were getting rid of its chemical waste in nearby Palestinian agricultural lands, or from waste and sewage water produced by the settlements themselves. Landfill dumps were also created for waste from inside Israel very close to Palestinian urban centres without prior approval from the Palestinians.

Issue	Frequency	Percentage
Environmental Protection	36	40.91%
Quality of life	8	9.09%
Clean Water/ Conservation/ Reuse/ well rehabilitation	7	7.95%
Promoting Agriculture/ Trees	6	6.82%
Polution/Waste from Israeli factories, settlements and inside Israel	6	6.82%
Environment Day	5	5.68%
Polution	4	4.55%
Other	16	18.18%
Total	88	100.00%

Although the bulk of activities to protect the environment revolve around awareness, education and one time cleaning days, 8% and 7% of the respondents mentioned respectively water related projects, and planting trees/ promoting agriculture as two examples of NGOs involvement in the environment. (Regional Stakeholder Consultations)

CS role environm	OPT	WB	
Insignificant	59.53%	64.08%	50.68%

IMPACT

4.1. Influencing public policy

This subdimension examines the extent to which civil society is active and successful in influencing public policy.

The extent to which civil society is active and successful in influencing public policy:

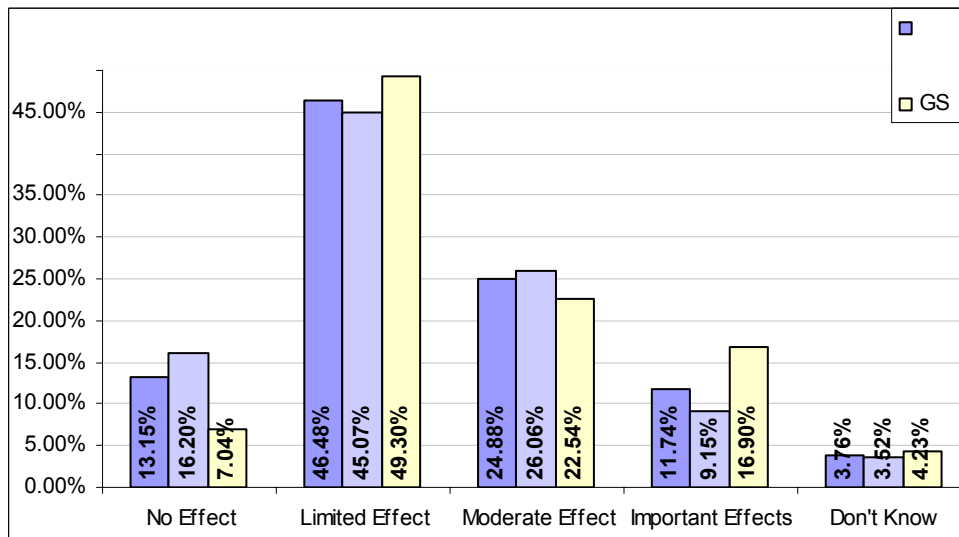

0	1	2	3
<i>Insignificant</i>	<i>Limited</i>	<i>Moderate</i>	<i>Significant</i>

4.1.1. – 4.1.2. Human Rights & Social Policy Impact Case Studies	How active and successful is civil society in influencing public policy?		
Score 0	Score 1	Score 2	Score 3
No CS activity of any consequence in this area can be detected.	CS activity in this area is very limited and there is no discernible impact.	Civil society is active in this area, but impact is limited.	Civil society plays an important role. Examples of significant success / impact can be detected.

4.1.1. – 4.1.2. Human Rights & Social Policy Impact Case Studies

There is a pretty large consensus on the level of CS activity regarding Social issues, if “somewhat active” and active criteria are grouped together then the total is 80% of all respondents. (Regional Stakeholder Consultations)

Of the total respondents more than 60% indicated that the level of CS success was limited to moderate. These responses are inline with the previous question regarding the level of activity of CS actors in social issues. (Regional Stakeholder Consultations)

Environmental Policy

Only 12.5% of respondents said that Civil Society actors were active in environmental issues, with a four times higher percentage (23.3%) of GS respondents than WB 7% (Regional Stakeholder Consultations)

Most respondents said that CS actors had no to limited effect on environmental public policy. Again, this corresponds to stakeholder answers in the previous question regarding level of CS activity. (Regional Stakeholder Consultations)

Special Needs and Disability Policy

Respondents in GS said that CS actors were very active in influencing policies related to disability and people with special needs (17.8%). However most of the respondents stated that CS actors were only somewhat active. (Regional Stakeholder Consultations)

A third of GS respondents thought that CS actors have had important effects on disability and special needs public policy. When compared with the activity levels of CS actors, it may be concluded that a limited level of activity is perceived by GS respondents as achieving important effects.

On the whole CS actors are perceived to have limited to moderate success in affecting public policy on these issues. (Regional Stakeholder Consultations)

Political Public Policy

Around 40% of respondents indicated that they thought that political public campaigns undertaken by CS were somewhat successful. Another 25% thought it was successful vs. 20% that thought it wasn't. Only 10% thought that CS was very successful in this area. (Regional Stakeholder Consultations)

There was not much of a consensus among respondents on the level of CS actors' influencing on politics. Only 17% of the respondents thought that CS actors were very active, with another third rating them as active, and a quarter of respondents saying that they were somewhat active. One fifth of the respondents thought that CS actors were actually inactive when it came to influencing public policy on political matters. (Regional Stakeholder Consultations)

Although the same percentage of respondents that thought CS actors were active in the political issues thought that they were also having important effects in that area. The majority of respondents said that CS actors had no or limited effect. Forty percent of respondents in GS said that their effect was limited. (Regional Stakeholder Consultations)

All issues

The highest percentage of Inactive rating was on the level of CS involvement in the Environment, followed by the political issue. Concurrently CS actors were considered the most active in the political matter. This shows diverging views among respondents on this issue. CS actors were rated somewhat active on their involvement in social and disability issues. (Regional Stakeholder Consultations)

Both graphs for the level of activity and corresponding level of success of CS actors in influencing public policy are very similar. With a slight discrepancy in the political issue graph where there was a larger percentage of respondents indicating that CS actors were active in the political issue while their influence was negligible to limited. (Regional Stakeholder Consultations)

A majority of respondents indicated that CS actors have been somewhat successful to successful in campaigning for the amendment of laws in the OPT. However, 18% of the respondents indicated that they did not know what the level of success was. (Regional Stakeholder Consultations)

Accessed 4-6-2004

¹³⁰ “PNGO Narrative Report 2003” http://www.pngo.net/reports/PNGO_Narrative_report2003.htm

The ranking which received the highest proportion of respondents across the board was “quite a lot”. In fact no institution received less than 25% of responses in these category. However there was considerable variation between the regions. (Community Sampling Survey)

Respondents had “quite a lot” of trust in the following institutions					
OPT		WB		GS	
Professional Associations	51.38%	Professional Associations	53.66%	Printed Press	59.14%
Religious Orgs.	49.47%	Large Private Sector	53.23%	Police	52.00%
Police	48.33%	NGOs	50.18%	PLC	49.47%
Judicial system	48.18%	Religious Orgs.	49.65%	Religious Orgs.	48.96%
PLC	46.83%	Judicial system	49.48%	Television/Radio	45.00%
NGOs	46.83%	Police	47.06%	Professional Associations	44.44%
PNA	44.70%	PNA	46.21%	Judicial system	44.33%
Large Private Sector	44.31%	PLC	45.94%	PNA	40.21%
Printed Press	41.73%	Labor Unions	41.11%	Security Forces	38.54%
Television/Radio	39.85%	Large Social Movements	40.09%	Political Parties	36.56%
Security Forces	37.83%	Television/Radio	38.10%	NGOs	36.05%
Labor Unions	37.60%	Security Forces	37.59%	Labor Unions	27.84%
Large Social Movements	36.64%	Printed Press	36.11%	Large Social Movements	24.62%
Political Parties	33.89%	Political Parties	32.96%	Political Leaders	24.47%
Political Leaders	26.29%	Political Leaders	26.91%	Large Private Sector	15.00%

Overall respondents had a high degree of trust in the various institutions. Certain striking differences were noted in the ranking between the WB and GS most notably that for the “large private sector companies” which was ranked second in the WB and last in the GS. The media including TV/Radio and the printed press was ranked in the lower half in the WB, whereas the printed press was ranked highest in the GS. NGOs were ranked third in the WB vs. 11th in the GS, this does support previous results which indicated that GS respondents did not feel that NGOs provided services in their communities. The last conclusion from the results of this ranking is the low level of trust in political parties and political leaders in both the WB and GS, with political parties getting a slightly higher percentage of respondents’ trust. (Community Sampling Survey)

Respondents “did not have very much” trust in the following institutions:					
OPT		WB		GS	
Printed Press	48.03%	Printed Press	53.47%	Large Private Sector	55.00%
Television/Radio	45.69%	Television/Radio	49.32%	Large Social Movements	49.23%
Political Parties	43.89%	Political Parties	45.69%	Professional Associations	39.51%
Political Leaders	42.55%	Political Leaders	45.09%	Political Parties	38.71%
Large Social Movements	41.44%	Labor Unions	41.11%	Labor Unions	38.14%
Labor Unions	40.33%	Large Social Movements	39.21%	NGOs	37.21%
Large Private Sector	34.69%	Security Forces	34.04%	Political Leaders	35.11%
Professional Associations	34.25%	Professional Associations	32.52%	Television/Radio	35.00%
Security Forces	34.13%	Police	32.18%	Security Forces	34.38%
NGOs	30.03%	PLC	30.74%	PNA	31.96%
Police	29.82%	Large Private Sector	28.52%	Printed Press	31.18%
PLC	29.10%	NGOs	27.80%	PLC	24.21%
PNA	28.42%	PNA	27.24%	Police	23.00%
Judicial system	23.18%	Judicial system	24.04%	Judicial system	20.62%
Religious Orgs.	16.84%	Religious Orgs.	16.90%	Religious Orgs.	16.67%

The judicial system and the religious organizations were consistently ranked lowest indicating that respondents had a fair degree of trust in these two types of institutions both in the WB and GS. Large private sector companies were ranked the highest among institutions that GS respondents did not have very much trust in. For the WB respondents the media ranked highest among the institutions that respondents did not have very much trust in, a view which was not shared by GS respondents. (Community Sampling Survey)

Respondents had “no” trust in the following institutions					
OPT		WB		GS	
Political Leaders	25.20%	Political Leaders	24.00%	Labor Unions	30.93%
PLC	20.63%	Security Forces	20.57%	Political Leaders	28.72%
PNA	19.90%	PLC	20.49%	Large Private Sector	27.50%
Political Parties	19.72%	PNA	20.34%	Judicial system	23.71%
Security Forces	19.05%	Political Parties	19.10%	Large Social Movements	23.08%
Labor Unions	18.80%	Police	16.61%	Political Parties	21.51%
Large Private Sector	17.78%	Large Social Movements	16.30%	PLC	21.05%
Large Social Movements	17.81%	NGOs	16.25%	PNA	18.56%
Judicial system	17.19%	Judicial system	14.98%	Security Forces	14.58%
Police	15.94%	Large Private Sector	14.83%	Police	14.00%
NGOs	15.70%	Labor Unions	14.44%	NGOs	13.95%
Television/Radio	10.15%	Professional Associations	10.16%	Television/Radio	12.00%

In the WB the first six ranked institutions by respondents who considered them to be untrustworthy were governmental or political institutions. Even though the media was ranked highest in the previous category, they were not considered as institutions that could not be trusted in the WB. The judicial system which received high levels of trust from GS respondents was ranked fourth by the rest of the respondents who had no faith in it.

GS respondents lacked the most trust in labor unions, which WB respondents did not agree with. The second ranked institution that WB respondents did not have any trust in was the security forces, which was ranked 9th by GS respondents. (Community Sampling Survey)

When calculating the CSO trust index, a value of **3.09** was reached on a scale of 1 to 4, 1 being quite a lot of trust and 4 being no trust at all.

¹³¹ “Results of Palestinian Public Opinion Polls No. 3” November 2003.

4.4.1 Informing/ educating citizens

Although 20% of respondents indicated that CS actors were very active in public education only 8.8% indicated that they thought CS were very successful. The rest of the responses seem consistent between the level of activity and the level of success CS had. In general respondents thought that CS actors were somewhat active to active (72%), and their level of success was somewhat successful to successful (83%). (Regional Stakeholder Consultations)

Although around half the respondents have indicated that CS actors have been successful in public education and information, a varied response was received on their success in various types of public campaigning, with the level of success ranging from 25 to 41 %.(Regional Stakeholder Consultations)

4.4.2 Building capacity for collective action	How active and successful is civil society in building the capacity of people to organise themselves, mobilise resources and work together to solve common problems?		
Score 0	Score 1	Score 2	Score 3
No CS activity of any consequence in this area can be detected.	CS activity in this area is very limited and there is no discernible impact.	Civil society is active in this area but impact is limited.	Civil society plays an important role. Examples of significant success / impact can be detected.

4.4.2 Building capacity for collective action

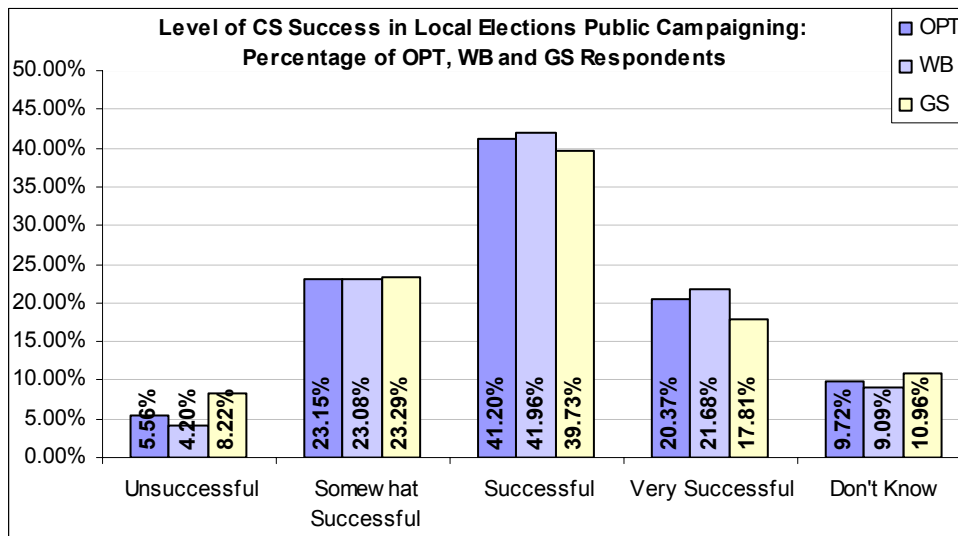

Only 2% of respondents described CS actors as being either very active or very successful in building the capacity of local communities, with most of them choosing somewhat active and somewhat successful to describe the level of their efforts and its results. (Regional Stakeholder Consultations)

4.4.3 Empowering marginalized people	How active and successful is civil society in empowering marginalized people?

4.4.6 Supporting livelihoods

¹³⁹ Abdul-Hadi, Izzat. August, 2000. p.39

Activity	Frequency	Percentage
General activities	21	15.56%
Work for food	15	11.11%
Employment-generation	13	9.63%
Workshops	10	7.41%
Food Aid	9	6.67%
Priority setting	9	6.67%
In-kind support	8	5.93%
Poverty Eradication day	7	5.19%
Research	6	4.44%
Meetings/lectures	5	3.70%
Campaigning on unemployment	5	3.70%
Demonstrations	5	3.70%
Financial aid (students)	4	2.96%
Fundraising	4	2.96%
Emergency activities	3	2.22%
Other	11	8.15%
Total	135	100.00%

Only ten percent of poverty eradication activities cited by respondents were employment generation projects undertaken by UNDP or Palestinian NGOs such as PARC, Faten and others. (Community Sampling Survey)

Service	Total	Percent
Employment opportunities	9	11.39%
Roads	8	10.13%
Electricity	7	8.86%
Water Network	6	7.59%
Teacher Rights	5	6.33%
Disabled rights & Services	3	3.80%
Health services	3	3.80%
Infrastructure	3	3.80%
Schools	3	3.80%
Sewage Network	3	3.80%
Other	29	36.71%
Grand Total	79	100.00%

However 11.4% of respondents thought that NGOs were active in lobbying for employment opportunities. General pressure was put on the government to provide employment opportunities to unemployed and fresh graduates, as well as raising the salaries of teachers. (Regional Stakeholder Consultations)

4.5. Meeting Societal Needs

This subdimension examines the extent to which civil society is active and successful in meeting societal needs, especially the needs of the poor and other marginalized groups.

The extent to which civil society is active and successful in meeting societal needs, especially those of traditionally marginalised groups, is:

0	1	2	3
Insignificant	Limited	Moderate	Significant

4.5.1 Lobbying for state service provision	How active and successful is civil society in lobbying the government to meet pressing societal needs?		
Score 0	Score 1	Score 2	Score 3
No CS activity of any consequence in this area can be detected.	CS activity in this area is very limited and there is no discernible impact.	Civil society is active in this area, but impact is limited.	Civil society plays an important role. Examples of significant success / impact can be detected.

4.5.1. Lobbying for state service provisions.

Of those that answered yes to the question of whether they could think of an example of CS lobbying for a public service a large percentage 31 and 37 thought that they were somewhat successful to successful, respectively. There was a difference between GS and WB respondents' rating of "very successful" with 20% of GS vs. 11.4% of WB. (Regional Stakeholder Consultations)

Level of Success of CS pressure for Public Services	OPT	WB	GS
Successful	37.14%	38.46%	35.48%
Very Successful	11.43%	5.13%	19.35%

Forty percent of respondents thought that CS efforts were generally successful to very successful in pressuring the Government to provide public services. (Regional Stakeholder Consultations)

4.5.2 Meeting pressing societal needs directly	How active and successful is civil society in directly meeting pressing societal needs (through service delivery or the promotion of self-help initiatives)?		
Score 0	Score 1	Score 2	Score 3
No CS activity of any consequence in this area can be detected.	CS activity in this area is very limited and there is no discernible impact.	Civil society is active in this area, but impact is limited.	Civil society plays an important role. Examples of significant success / impact can be detected.

4.5.2. Meeting societal needs directly.

Only 19% of respondents could not think of an example of CS actors providing public services to the population. (Regional Stakeholder Consultations)

Target Group	Frequency	Percentage
General Population	57	36.08%
Poor communities/People	39	24.68%
Women	32	20.25%
Disabled/Special Needs	9	5.70%
Youth	4	2.53%
Other	9	5.70%
Do Not Know	8	5.06%
Total	158	100.00%

A third of respondents thought that public services were directed at the general population while 25% thought that the main target was poor communities and a further 20% saying that women were the main target. Only 5% of the respondents indicated that the disabled those with special needs were targeted by CS actors.

There is strong consensus among respondents that CS actors have been successful in providing services directly to the population (63%). (Regional Stakeholder Consultations)

However, 20% of respondents evaluated CS role as being insignificant in meeting societal needs. With only 8.3% evaluating their role as significant with a large discrepancy between the WB and GS (11% vs.2.7%) CS actors' success in providing direct services to the population does not reflect a significant role in meeting these overall needs as evaluated by stakeholder respondents. (Regional Stakeholder Consultations)

Results for the GS are exactly the opposite of those for the WB. Whereas 71% of WB respondents indicated that they do remember an organization helping their community in the past year, the same percentage of GS respondents indicated that they did not. (Community Sampling Survey)

- The Jerusalem Committee, a PNGO subcommittee organized emergency committees to meet needs including:

- Humanitarian Aid, Human Rights, International Solidarity, Media, Emergency Fund¹⁴⁰
- “Since the construction of the wall, there have been many predictions of collapse of isolated health facilities. However despite access problems, the ability to maintain service provision through the public and NGO sectors has been admirable.”¹⁴¹
- Change in donor priorities towards public policy, civic education and democracy diminished role of NGO emergency & relief work. “This effect was clear among charitable organizations that did not respond adequately to the new developments... This policy resulted in ignoring the urgent and relief programs aimed at resisting the occupation, which in turn negatively reflected on meeting the basic needs of the Palestinian society and on the level of funding among non-governmental organizations.”¹⁴²

4.5.3 Meeting needs of marginalised groups	To what extent are CSOs more or less effective than the state in delivering services to marginalised groups?		
Score 0	Score 1	Score 2	Score 3
CSOs are less effective than the state.	CSOs are as effective as the state.	CSOs are slightly more effective than the state.	CSOs are significantly more effective than the state.

4.5.3. Meeting the needs of marginalized groups.

When asked about which organizations they consider to provide the better services for marginalized people there were significant differences between respondents from the WB and GS. Both sets of respondents indicated that they considered international agencies to be the better providers of services for marginalized people. However only 10.6% of GS respondents indicated that they thought NGOs were the better providers vs. 29.8% who thought that the PNA was a better providers. WB respondents provided an opposite assessment 35.32% chose NGOs as better service providers vs. 13.6% who chose the PNA. (Community Sampling Survey)

¹⁴⁰ “PNGO Narrative Report 2002.” http://www.pngo.net/reports/PNGO_Narrative_report2002.htm Accessed 4-6-2004

¹⁴¹ Jubran, Joan. August, 2005.

¹⁴² Abdul-Hadi, Izzat. August, 2000. p.38

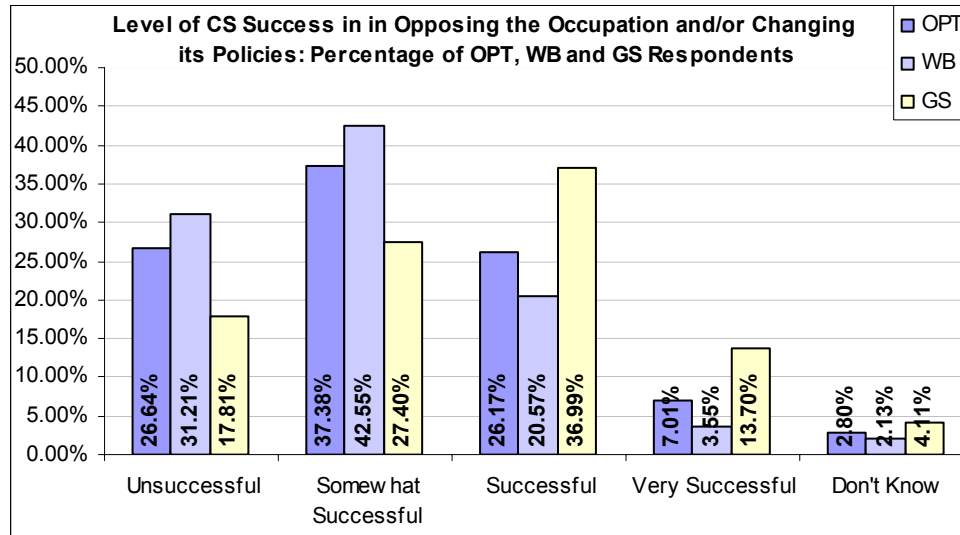

Although 70% of GS respondents indicated that they could not remember an organization helping their community, only a quarter did not turn to any organization for help. A quarter received help from a PNA institution while a further 42% were helped by an international agency. For the WB respondents half of them did not turn to any organization for help, and only 8.7% indicated that they were helped by a PNA institution, whereas most of the respondents who received help indicated that they got it from either an international agency (22.3%) or from an NGO (18.5%). (Community Sampling Survey)

4.5.4 Opposing the military occupation	To what extent are CSOs more or less effective than the state in opposing/resisting occupation?		
Score 0	Score 1	Score 2	Score 3
CSOs are less effective than the state.	CSOs are as effective as the state.	CSOs are slightly more effective than the state.	CSOs are significantly more effective than the state.

4.5.4. Opposing the military occupation

Less than 7% of respondents indicated that CS actors were inactive in resisting the occupation.

However, 27% of respondents indicated that they were unsuccessful. Once again this is an indication that the obstacles faced by CS actors in changing political realities especially when faced with a military occupation by Israel.

GS respondents were once again more optimistic with 37% of them saying that they thought CS actions were successful. This might be explained by the recent withdrawal of the Israeli army from the Gaza Strip. However, this view might change in the next few months depending on the actual consequences of this withdrawal. (Regional Stakeholder Consultations)

Examples of CSO resistance activities	Total	Percent
Resisting Apartheid Wall	38	34.55%
Achieving Gaza Withdrawal	14	12.73%
General Resistance	9	8.18%
Exposing Violations Internationally	8	7.27%
Achieving ICJ Ruling	7	6.36%
Easing of freedom of movement	6	5.45%
Organizing International Solidarity	6	5.45%
Educating Palestinians	4	3.64%
Other	18	16.36%
Grand Total	110	100.00%

Specific examples of CS actors engaging in the resistance of military occupation focused on their role in fighting the apartheid wall. The withdrawal from GS was also cited as a result of CS involvement in resistance during the past thirty years. The ICJ ruling in 2004 demanding Israel to stop construction on the separation wall was also attributed to CS advocacy and lobbying activities locally and internationally. (Regional Stakeholder Consultations)

Media Review Report

1. Introduction

- 1.1. Strong relationship between the media and civil society is significant and important component of democratic transition within the Palestinian context.
- 1.2. Since Oslo there has been a significant increase in media in Palestine due to the lifting of restrictions that were previously imposed by the Israelis. Two main newspapers were established, as well as a number of local radios and private TVs.
- 1.3. There is a new law for media which is a flexible one and allows for the establishment of different media institutions. However, the law is being revised and its unclear whether the outcome will be for the benefit of free expression.
- 1.4. Investigative reports, critical coverage of certain events and issues. Which will contribute to the development of civil society. No sufficient resources, no incentives, and no real understanding of development and wider concept of their role and influence.
- 1.5. Lack of training to act as journalists.
- 1.6. The relationship between the media and civil society is very weak. This is due to:
 - 1.6.1. Perception of the media of NGOs and civil society vs a vis accountability and transparency. (influenced by the general opinion of NGOs cooptation by donors, and corruption and aligned with external interests, and don't adhere to a national agenda.)
 - 1.6.2. NGOs are under the impression that Palesitnian media is not professional and is coopted by the Palestinina authority and is mainly political driven. And their role in promoting civil society is weak.
 - 1.6.3. lack of a structured consulatative process between media and Civil society. And an absence of trust and mutual understanding of different relevant roles in promoting and strengthening democracy and public liberties and state building processes.
 - 1.6.4. No understanding of complimentary roles between both sides.
 - 1.6.5. Civil society has been accused of not defending journalists and freedom of speech when censored or harassed by the Palestinian Authority.
 - 1.6.6. Civil society uses the media to promote their image and to cover news of their activities rather than a more fundamental role of policy development, advocacy, awareness building as well as monitoring critiquing civil society's role in maintaining and defending the rights of Palestinian society.
- 1.7. In spite of the above mentioned challenges and obstacles it has been noticed that there is an actual effort from both sides to improve the relationship based on a mutual vision understanding and strategies of the importance of the relationship between both of them in order to contribute substantially to statehood building and civil society strengthening. This has been illustrated through different meetings conducted recently between representatives from both sides. And based on verified data of our own empirical research.
- 1.8. Internal issues are marginalized and more there's more emphasis on the political aspects with less interest in People's lives and problems.

The 1995 Palestinian Press Law states, "no security agency has any right to question, interrogate, detain, incarcerate or arrest a journalist on matters pertaining to his work." The law does not provide for formal censorship. However, Article 37 prohibits the publication of articles that may cause harm to national unity.

The Ministry of Information licenses the media. The General Intelligence Directorate has established a Bureau of Press Information to accredit and monitor foreign media. The Voice of Palestine Radio and two television stations are government-controlled, but many private media and research organizations maintain active presences in print and online. Of particular interest is the Palestine Center for Policy and Survey Research (PSR), which continues the valuable polling efforts of the Center for Palestine Research and Studies. The Jerusalem Media and Communication Centre (JMCC) also conducts regular polls and issues the Palestine Report, an excellent weekly news summary that reports on the activities of civil society.

1.9. Objective

As stated in the Media Review user guide, the review of the media had two general purposes:

- a) Provide information on specific civil society activities/actors which are reported in the media so that the review can inform the scoring of each of the indicators.
- b) Establish whether and how civil society is represented in the media.

1.10. Methodology

1.10.1. Media sources,

Media Name	Type	Region
Al Quds Newspaper	Print	National
Al Ayyam Newspaper	Print	National
Palestine Radio	Radio	National
Palestine TV	TV	National
Nablus TV	TV	Nablus
An Najah Radio	Radio	Nablus
Ajyal Radio	Radio	Ramallah
Amwaj Radio	Radio	Ramallah
Wattan TV	TV	Ramallah
Bethlehem 2000	TV	Bethlehem
Almahed	TV	Bethlehem
Youth Voice Radio	Radio	Gaza

Al Quds newspaper is the most widely read in the West Bank and Gaza Strip, it contains more number of papers than Al Ayyam, and covers most of the news, events in the OPT, has been since 1967 the main printed media source.

Al Ayyam, is a more intellectual type of newspaper established by a prominent journalist following the Oslo agreements, and tends to focus more on articles, opinions, translations from the Israeli media, and occasionally articles from arab and international newspapers.

Palestine Radio, which is the national radio station established by the Palestinian Authority is the most listened to radio station, with varied types of programs and regular news broadcasts.

1.10.2. Review period

Media review started in October and ended in February. All media was reviewed for four months except for Palestine TV, and Youth Voice radio that were reviewed for three months by our media reviewer from Gaza. In Bethlehem after starting out with one TV station and

one radio station, it appeared that the radio station did not cover any civil society news and was mainly an entertainment one. Therefore after one month media reviewer in Bethlehem switched to Al Mahed TV.

1.10.3. Approach to media data collection

1.10.3.1. Media reviewers

Seven media reviewers were recruited, two were Bisan staff who volunteered to review media in Bethlehem and Nablus. Three others were students at Birzeit University majoring in media studies, and a fourth from Al Najah University, a reviewer involved in civil society was recruited from Gaza.

1.10.3.2. Training

Two training sessions were organized for the media reviewers. The first took place with four of the media reviewers early October. A second training was organized a week later for two additional reviewers who could not make it to the first training.

The training consisted of a general presentation of CSI project, its objectives and main outcomes. Then there was a discussion on civil society and its definitions. Various organizations were cited as examples and then categorized according to the definitions in the media review methodology. The second part of the training consisted of The media reviewer in Gaza was trained through three long phone calls. The same training was divided into three sections and the papers and notes were faxed to Gaza and then discussed on the phone.

Excercises were done in the same way, where the media reviewer filled out the data sheet for three news items in one of the newspapers. The method of data entry and classification were then discussed on the phone.

1.10.3.3. Monitoring and followup

During the first month a meeting was scheduled ten days after the first media review training. A meeting was scheduled every month to discuss progress and issues. Media reviewers would have questions regarding certain media items, how to classify them based on topic and what types of civil society organizations to chose. Some of these questions would be answered on the phone. During each meeting one or two news items would be photocopied from one of the newspapers and media reviewers would be asked to analyze and fill out the media review sheet. Responses would then be compared and discussed. The objective of this exercise was to try to reach a uniform method of classifying and organizing data.

1.10.4. Data analysis

2. Research Findings

2.1. Main features of civil society reporting in the media

This section explores the quantity and visibility of media reporting on civil society. You should describe:

1. **Frequency of reporting:** Describe the number of media items for the different *medium* (query *Percentage Medium*) and, if you monitored different medium types (TV, radio, print) also for *medium type* (query *Percentage MediumType*)¹⁴³.

¹⁴³ As only a small number of NCOs monitored TV and Radio, the remainder of the guide only refers to *medium*. In case you have monitored TV, Radio as well as newspapers, please always also cross-tab with *medium type*, for those instances when the guide indicates a cross-tab with *medium*.

Query Percentage Medium Type

Medium Type	Count of Medium Type	%
TV	254	15.66%
Radio	498	30.70%
Print	870	53.64%
Total	1622	100.00%

The highest number of media items came from newspapers (print) over half, less than a third from the radio and only 16% from the Television stations.

Query Percentage Medium

Medium	Count Of Medium	%
AL Ayyam newspaper	462	28.48%
AL-Quds newspaper	408	25.15%
Palestine Radio	213	13.13%
Nablus TV	102	6.29%
Najah Radio	96	5.92%
Ajyal Radio	90	5.55%
Youth Voice Radio	88	5.43%
Palestine TV	73	4.50%
Wattan TV	38	2.34%
Al Mahed TV	28	1.73%
Bethlehem TV	13	0.80%
Amwaj Radio	11	0.68%
Total	1622	100.00%

Al Ayyam newspaper had a higher share of news items than Al Quds newspaper even though Al Quds has a wider readership and contains a larger number of pages.

Although Watan TV which is a television station owned by a number of civil society members and is expected to devote a share of its programs and coverage to civil society issues contributed to less than 3% of the total number of news items.

Nablus TV, Najah Radio, Ajyal Radio, Youth Voice Radio and Palestine TV contributed more or less the same percentage of media items during the period of monitoring.

Palestine radio however seemed to have the highest percentage of coverage.

2. **Placement within media:** Describe the prominence media reports on civil society receive in the different *mediums* using *Prom Points* (query *Percentage PromPoints*) and *Page/Item Number* (query *Percentage ItemNo*).

Prom Pts	Count Of Prom Pts	%
	0	0.00%
1	86	5.30%
2	86	5.30%
3	90	5.55%
Op/Ed	4	0.25%
	1622	

Prom points are given to media items, if they appear on the first, second or third page of a newspaper, or if they are the first, second, or third items in a radio or television program. Opinion/editorial prom points are only given to media items that take this format in the printed media.

An equal number of media items related to civil society received 1, 2, or 3 prom points. Out of the total number of media items, around 17% received prom points. While only four items out of 1622 were in the opinion/ editorial section.

3. **Forms of reporting:** Describe the distribution of articles per news item *type* (query *Percentage Type*). Also, cross-tab the *type* with *medium* (query *Count type_medium*) to examine potential ‘reporting type’ preferences of the different media sources.

2.2. Thematic focus

This section describes the thematic areas covered by the media in reporting on civil society issues. You should describe:

2.2.1. Main themes:

- Describe the coverage of different *topics* in the media (queries *Percentage Topic1* and *Percentage Topic2*). Please note that it is advised to aggregate the list of more than 30 topics into a smaller number of categories (e.g. politics, economy, social issues, civil society; cultural issues; etc.). CIVICUS will be happy to assist you in developing a smaller category system which fits your country context and data structure.

Topic 1	Count of Topic 1	%
National Politics	384	23.52%
Education/ Training	159	9.74%
Military Occupation	141	8.63%
Local Government	132	8.08%
Advocacy	101	6.18%
Labor, Unemployment	87	5.33%
Health	81	4.96%
Human Rights	65	3.98%
Civil Society	51	3.12%
Gender Issues	44	2.69%
Business	42	2.57%
Poverty	37	2.27%
Other	309	18.92 %
Total	1633	100%

National Politics is considered the main topic for many of the news items monitor, with a little less than a quarter of all news items monitored falling into that category. The occupation remains a main subject for around 8.6% of news items regarding Civil society. With poverty getting less than 3% of media coverage

Topic 2	Count of Topic 2	%
Business	330	20.42%
Other	149	9.22%
Civil Society	123	7.61%

Human Rights	114	7.05%
National Politics	114	7.05%
Local Government	89	5.51%
Military Occupation	63	3.90%
Gender Issues	60	3.71%
Justice System	59	3.65%
Advocacy	58	3.59%
Education/ Training	46	2.85%
Crime	44	2.72%
Other	367	22.71%
Total	1616	100%

- Describe the combination of main *topics* with different secondary *topics* (query *Count topic1_topic2*). Also, cross-tab *topic* with *medium* (query *Count topic1_medium*) to describe the topic structure for the different media sources, as well as with *Prom Points* (query *Count topic1_prompoints*) to explore the different prominence of topics within the different mediums.

2.2.2. Geographic focus:

- Describe the distribution of international, national, provincial/regional and local news on civil society using the *origin* variable (query *Percentage Origin*). Cross-tab the *origin* with *medium* (query *Count origin_medium*) to explore potential differences among the different media sources as well as with *topic* (query *Count origin_topic1*) to detect thematic differences.

Origin	CountOfOrigin	%
International	35	2.31%
National	694	36.39%
Provincial/ Regional	42	2.67%
Local	831	58.63%

The majority of responses were at local level even though half of the media reviewed was national media, while less than 3% of the news covered the international or regional level.

The low level of regional news covered is indicative of the geographic fragmentation of the Palestinian Territories.

2.3. Civil Society Actors & Issues

This section examines the reporting on different types of CSOs as well as the different civil society issues. You should describe:

2.3.1. Reporting on CSO Types:

- Describe the frequency of reporting for different *CSO types* in the items (query *Percentage CSOType*). Cross-tab *CSO type* with *medium* (query *Count CSOType_medium*), *topic* (query *Count CSOType_Topic1*), *origin* (query *Count CSOType_origin*), *prominence* (query *Count CSOType_prompoint*) to describe differences in reporting in greater detail.

CSOTypeCode	Count of CSO Type	%
-------------	-------------------	---

Advocacy CSOs	274	20.48%
Political parties	181	13.53%
Service CSOs	152	11.36%
Associations of socio-economically marginalised groups	86	6.43%
Women's associations	73	5.46%
Student and youth associations	69	5.16%
Non-profit media	67	5.01%
CSO networks/federations/support organisations/single issue coalitions	60	4.48%
CSOs active in education, training & research	57	4.26%
Others	319	23.87%
Total	1338	100.00%

The CSO types most covered by the media are advocacy CSOs, followed by political parties and Service CSOs.

2.3.2. Civil Society Issues:

- The CSI indicators, sub-dimensions and dimensions provide a basic description of the prominence of different issues in the media's reporting on civil society issues. Describe the frequency of reporting per dimension (query *Percentage Dimensions*) and cross-tab with *medium* (query *Count Dimensions_medium*), *topic* (query *Count Dimensions_topic1*), *origin* (query *Count Dimensions_origin*).

Medium	Structure	Environment	Values	Impact
AL Ayyam newspaper	597	626	422	729
AL-Quds newspaper	667	755	377	970
Youth Voice Radio	79	222	65	218
Nablus TV	117	170	60	116
Palestine TV	56	200	66	174
Ajyal Radio	90	104	70	93
Amwaj TV	15	12	7	34
Wattan TV	45	71	37	68
Almahed TV	149	36	23	38
Bethlehem TV	78	15	18	23
Najah Radio	117	130	44	143
Total	2010	2341	1189	2606
Percentage	24.67%	28.74%	14.60%	31.99%

The news items have been classified according to the different dimensions covered: Structure, environment, values and impact of civil society. Its interesting to note that the large percentage of responses have been classified as impact where as values of civil society were only covered in 14.6% of all news items.

- For each sub-dimension, describe the frequency of reporting for each indicator (queries *Count all Indicators*, *Count Indicator per Indicator*) and cross-tab with *medium* (query *Count Indicator_medium*).

SubDim	CountOfIndicCode	%
1.1.	462	5.2%
1.2.	213	2.4%
1.3.	122	1.4%
1.4.	839	9.4%
1.5.	409	4.6%
1.6.	189	2.1%
2.1.	1535	17.1%
2.2.	402	4.5%
2.3	108	1.2%
2.4.	246	2.7%
2.5.	117	1.3%
2.6.	284	3.2%
2.7.	36	0.4%
3.1.	425	4.7%
3.2.	203	2.3%
3.3.	138	1.5%
3.4.	256	2.9%
3.5.	167	1.9%
3.6.	125	1.4%
3.7.	33	0.4%
4.1.	711	7.9%
4.2.	143	1.6%
4.3.	384	4.3%
4.4.	1033	11.5%
4.5.	374	4.2%
Total	8954	100.0%

2.4. Civil Society's image in the media

This section examines how civil society is portrayed in the media.

- Describe the representation of civil society in the monitored items (Query *Percentage repCSO*). Apart from reporting the percentages, you should also provide the average score (query *average repCSO*).

Representing CSO	Total	%
Negative	54	3.31%
Neutral	295	18.06%
Positive	1284	78.63%
Total	1633	100%

The image of Civil Society represented in the media is overwhelmingly positive with over three quarters of news items reviewed indicated that the image of civil society was a positive one. Only three percent of the news items indicated that Civil Society had a negative image in the media. The low percentage indicates that media is generally promoting civil society but is not however providing any critical analysis or in depth study of their work and values.

Total Gaza Strip		100

Type of Locality

Respondents Profile

Type of dwelling

ANNEX 2
REGIONAL STAKEHOLDERS CONSULTATIONS
RESPONDENTS' PROFILE
 Type of Locality

In the West Bank 35% of stakeholders interviewed came from rural areas, 11.3% from small towns, 12% from refugee camps, while 42% were from cities.

In the Gaza Strip 10% were from rural areas or villages, 30% were from a refugee camp and 48% were from a city/town.

Sex of Respondents

Thirty one percent of those interviewed were female while 70% were male.

Income Level of Respondents

Eight percent of those interviewed had income of less than a thousand while the main bulk had an income of between 1000-3000 NIS. Almost half of those interviewed had an income that exceeded 3000 NIS.

Education Level of Respondents

Only 7% of those interviewed had a high school degree only. 93% had a university degree or equivalent.

Age of Respondents

Most of those interviewed were between the ages of 31-40 (40%), there were no interviewees below 21 years of age, 32% were between 41-50 and 10% were above 50.

Region of Respondents

The interviews were more or less distributed evenly between the five regions divided by this study. The middle of the WB had a higher percentage because it contained the Ramallah and Jerusalem areas which are central for Civil Society activities, as well as government, universities and media.
